ACKNOWLEDGEMENTS

**With the name of Allah the most Gracious, the most Merciful creator,
I seek His Blessing on His Prophet Muhammad s.a.w**

All praise and glory be to Allah S.W.T whose infinite generosity has given me the strength to complete this final project in time.

My sincere gratitude, thanks and most appreciation goes to Encik Saharbudin Naim bin Tahir Shah as my supervisor, Puan Sofianita binti Mutalib as my thesis coordinator and my course tutor Puan Nor Aziah binti Daud for their guidance, encouragement, comments and references. They are such a great person who has paved the way for me throughout the overall research project.

I would also like to express my grateful thanks to all my colleagues for their opinion, suggestion and cooperation they gave. Also thanks for their morale support during the months I spent preparing this final project.

To my beloved parents and family, who are always there for me whenever I need them and million of thanks for all the supports, blessing, loves and financial support they give to me. Finally, to whom I failed to mention, who directly contributed to this project. Thank you very much.

ABSTRACT

This research project is about developing College Student Allocation System using Wampserver and web application framework in UiTM. The objectives of this research are to identify all the requirement specification of College Student Allocation System (CSAS), to model the design of College Student Allocation System (CSAS) based on requirement specification and to develop the prototype of the College Student Allocation System adopting web application framework that is MamboServer. The researcher gets the data collection from the interview and questionnaire to gather all the requirement that are needed in this research and prove the findings at the end of the research. In the end of research project period, researcher found that the result is complying with the objectives and therefore all the objectives in this research project have been achieved.
