INTRODUCTION OF THE PROJECT PLANNED

LOCATION OF BUSINESS SITE

Landscapes and landscaping was great jobs, as it will deals with environment for humans comfort ability, safety and fun. So, here we can say that whatever things that we found on the earth such as buildings, roads, plants, lakes and hills are called 'landscapes'. It also includes the phisiography or our natural environment such as the ocean, forests and rivers that become the most important factors of human's activities in economic, social and cultures.

While 'Landscaping' means, all the processes on planning, designing and approve to the environment based on creativities and the environment balance it. Besides, this will help to create better relationship between the natural environment and humans.

We have done a simple researching on this activities of dealing with environment, it can be developed more and gaining higher profits. Then, we got our ideas to combine together to produce services on landscaping; besides all of us are very interested in this job.

So, we wanted to provide services in landscaping construction on lawn designing, parks and Rock Garden. We will provide Nursery for a lot of plants types and provide services that interconnected with plants; flowers to plants, to be rented, sold or even we will provide it for events especially on wedding or funeral.

ADMINISTRATION PLANNING

The most important part on this department is the systematic administration system to achieve whatever we want to gain. The planning must do in a correct way, efficiently and full of critical care to make sure all of the strategies arranged were obeyed.

- i. To create an organization on Nursery and Landscaping Construction that So, we have decided to create full systematically administration plan to gain our vision on our trading that we will be going through. We must have a good plan so that we can organize the entire source we have to gain a maximum profit in this trading. To find other alternatives and achieve profits and widen the market share.
- ii. To create a relationship and co-operation to the other professional agencies, government and public, so that we can go further to compete as well as we can work together to gain the better achievement in business and improve the economies at the same time.
- iii. To deal with the environment as the environment must be maintained to gain the balance of living standard nowadays.
