The Journey – Discover the Industry With Us

The Faculty of Pharmacy, Universiti Teknologi MARA Cawangan Pulau Pinang (UiTM CPP), Kampus Bertam, recently welcomed representatives from Sunway Multicare Pharmacy (SMP) as part of the Sunway Campus Tour program. The one-day engagement program was designed to strengthen collaboration between the university and industry with the aim to enhance students' career opportunities within the retail pharmacy sector.

The visit began with a strategic engagement session involving the academic staff of the faculty and SMP Senior Management team. The session commenced with an introduction to both organizations, followed by a presentation on Sunway Multicare Pharmacy's business operations, organizational growth, and career opportunities available to Diploma in Pharmacy graduates. The discussion also explored potential future collaboration initiatives, including student development programs, industry engagement activities, internship opportunities, and graduate employability initiatives. The delegation was then introduced to the faculty's teaching and learning environment including its laboratories.

The visit provided an opportunity for the industry representatives to gain a better understanding of the faculty's commitment to producing competent and industry-ready graduates.

SMP

Career Talk and Internship Opportunities

The afternoon program was a Career Talk Session with pharmacy students. Representatives from SMP shared valuable insights into career opportunities, professional growth pathways, and the future of community and retail pharmacy practice. Students were exposed to the realities of the retail pharmacy industry, including workplace expectations, career progression opportunities, and the evolving role of pharmacists in delivering patient-centered care.

A major highlight of the visit was the internship placement interview session conducted by SMP. Selected students were given the opportunity to undergo interviews for internship placements. This initiative further demonstrates the faculty's commitment to enhancing graduate employability through meaningful industry partnerships and experiential learning opportunities.

Empower Career-Ready with Industry

The Faculty of Pharmacy extends its sincere appreciation to SMP for their visit and continued support in developing future pharmacy professionals. The collaboration serves as an excellent example of how industry engagement can enrich student learning experiences, strengthen career readiness, and improve graduate employability.
