MOHD ARIF BIN MOHD REDZUAN

DIPLOMA IN PLANTING INDUSTRY MANAGEMENT

FACULTY OF PLANTATION AND AGROTECHNOLOGY

DECEMBER 2016 – APRIL 2017

## ACKNOWLEDGEMENTS

Firstly, we want to thank to God for giving us the strength and blessing for letting us complete our industrial training in LIGS SPG Tulid, Keningau.

We would like to thank SPG Tulid for giving us the chance to learn and gained new experience during our industrial training. It is indeed a great honour to meet and learn from Mr. Frankie Joilin known as the manager of SPG Tulid and also the alumni of DPIM Sabah for his guidance and continuously giving us knowledge in work about managing workers. He had also taught us on how to manage rubber planting and oil palm planting as professional. He encourages us to always think outside the box meaning that to try everything new and give high commitment during work. We appreciated all his guidance and dedication in order for us to complete our industrial training.

We also would like to express our gratitude to Mr. Mohd Hisham bin Mohd Jais the assistant manager of SPG Tulid for giving us a place and supervise us on task given by showing us on how to do the works.

Furthermore, not to forget the excellence staff at SPG Tulid that always taught us even though their time with us was very limited. They also were very humble in giving us knowledge without any hesitation. We also want to thank to our parents because had support us during our training in SPG Tulid.

4.1 Germination of rubber seedlings 35

4.1.1 Seedlings planting 35

4.1.2 Manuring 35-36

# CHAPTER 1

# INTRODUCTION

## 1.0 BACKGROUND

Based from the report of Lembaga Industri Getah Sabah (LIGS) in 1980 entitled "Rubber Settlement Scheme Tulid ( Nandagan ) Keningau" had stated that the state government has intend to develop areas of 3000 acre " government land " at Nandagan localities. Embodiment of Skim penempatan Getah is to give chance for the resident of the poor which live near the locality by involving them as settlers and will be managed by LIGS in commercial state.

One that makes Rubber Settlement Scheme Tulid unique from other Rubber Settlement scheme is it developed and planted oil palm as well due to the suitable land condition. SPG Tulid can be seen by searching their signboard located near Nandagan as shown in the Figure 1.1.

According to the letter from the director of land survey department and only signed by K.G Floyd (Land Development planner), the number LS.1302.1.35.1.81 in 28 August 1982 to surveyors Keningau district, the area proposed for Rubber Settlement Scheme Nandagan is available and LIGS have been assign to occupy the area.
