ACKNOWLEDGEMENT

Alhamdulillah, in the name of Allah the All Mighty, the Most Compassionate, the Most Merciful and the Most Gracious, praise to Allah, the one and only, for giving me patience, strength and ability to complete this thesis.

First and foremost, I would like to thank Dr. Noor Habibah Binti Hj.Arshad because of her guides on what and how to do this thesis. I also owe deep thanks to my supervisor Pn. Riaza Perveen Bt Mohd Rias for her guidance, idea and patience in assisting my thesis from proposal up to the completion of the dissertation, and thank her for giving me the opportunity to work under his supervision.

I strongly appreciate the role of my parents, who invested much time in sowing the seeds of inspiration that have eventually (perhaps inevitably) led me to academia and research. Without them I will not be able to finish this research.

I also would like to thank all Mara University of Technology's students for their cooperation in completing this thesis. Besides that, I also wish to thanks my friends especially to Nor Barina Bt Mohd. Mustafa for helping and support me to complete this thesis.

Lastly, my gratitude extends to all individuals who have contributed either directly or indirectly in ensuring the success of this research. Thank you.
