

Agro Siswa Lestari Harvests Organic Hydroponic Produce to Advance Sustainable Development Goals at UiTM Perak

Seri Iskandar, January 2026 – UiTM Cawangan Perak continues to strengthen its Green Campus agenda through a student-led hydroponic farming project managed by Agro Siswa Lestari under the Hydropreneur Committee, led by Dr. Wan Nor Anira.

The initiative enables students to cultivate pesticide-free organic vegetables using sustainable hydroponic farming techniques while gaining practical experience in sustainable agriculture, project management, and agripreneurship. Freshly harvested vegetables, including kangkung and sawi, were sold during monthly sales on 14 November 2025 and 16 January 2026, promoting healthy food choices and supporting local food production.

The project provides valuable experiential learning opportunities that equip students with entrepreneurial skills while fostering environmental responsibility and innovation.

The Hydropreneur initiative contributes to the United Nations Sustainable Development Goals (SDGs), particularly SDG 2 (Zero Hunger), SDG 3 (Good Health and Well-being), SDG 4 (Quality Education), SDG 8 (Decent Work and Economic Growth), SDG 12 (Responsible Consumption and Production), and SDG 15 (Life on Land), reflecting UiTM Perak's commitment to sustainable campus development and community engagement.
