SINERGI

18/06/2025 / SUZANA YUSOF

Puncak Alam, 13 May 2025 – In a continued effort to enhance global academic collaboration and foster cross-cultural understanding in healthcare education, the Centre for Nursing Studies, Universiti Teknologi MARA (UiTM) Puncak Alam, successfully hosted an international online lecture on *Complementary and Alternative Medicine (CAM)*. This session was part of the academic component for the NRS461 course, designed for final-year nursing students.

The two-hour session, conducted via Google Meet, featured a distinguished speaker, Prof. Dr. Siti Syabariyah, Vice-Rector I and Lecturer of the Bachelor of Nursing Programme at Universitas 'Aisyiyah (UNISA) Bandung, Indonesia. Prof. Dr. Siti delivered a comprehensive lecture that covered the philosophy, types, and implementation of CAM in Indonesian healthcare settings, offering students a unique comparative perspective on global CAM practices.

Joining the session as the Moderator was Ms. Suzana Yusof, a Senior Lecturer at the Centre for Nursing Studies, UiTM Puncak Alam. Ms. Suzana provided local context by discussing the integration of CAM within the Malaysian healthcare framework and nursing education. Her input facilitated a rich dialogue that bridged theoretical knowledge with clinical practice across borders.

This lecture is part of an ongoing academic engagement initiative between UiTM and UNISA Bandung, aimed at nurturing global-minded healthcare professionals. By exposing students to diverse healthcare philosophies and practices, such programs are instrumental in shaping competent, holistic, and culturally sensitive nurses.
