WORKSHOP

Strategic Document Preparation Workshop UiTM2030

19 November 2025

FKE successfully conducted a special workshop for the preparation of three key strategic documents required by Pejabat Transformasi Universiti (PTU), namely the UiTM2025 Impact Study, the UiTM2030 Strategic Plan and PTJ Roadmap, as well as the 2026 Strategic Action Plan (SAP). The implementation of this workshop aimed to ensure that all documents were prepared in accordance with the guidelines and templates set by PTU, while aligning the faculty's strategic direction towards achieving the UiTM2030 targets. The session involved faculty leadership, FKE professors, and representatives from relevant units who collaboratively reviewed the requirements, performance indicators, and long-term planning of the faculty. Through focused discussions and teamwork, the workshop produced clearer, more structured, and impactful document frameworks to drive excellence in academics, research, and human capital development. The organisation of this workshop signifies FKE's commitment to supporting the university's agenda, while strengthening the faculty's readiness to face the challenges of higher education leading up to 2030.
