ACKNOWLEDGEMENT

Bismillahirrahmanirahim...

Alhamdulillah. Our grateful gratitude is given to Allah S.W.T for His permission throughout completing this dissertation. Without His blessing, we may not have the strength to face all the challenges that exist during the accomplishment of this task at the given period.

Many people contributed their time, effort and ideas in to completing this dissertation, which include our honourable supervisor, Puan Suliana bte Arifin. Therefore, our sincere thanks are devoted for her invaluable guidance, tolerance and encouragement that shown in the entire learning process.

Moreover, we owed a grateful appreciation to our lovely parents, all the family members and colleagues on behalf of their contribution in term of encouragement, financial support, time spend, cooperation, positive suggestion from the begining till the end of this study completion. Last but not least, we also acknowledge and very pleased with all the commitments that come from all individual that involve direct or indirectly in process of finishing this task.

Thank you very much.

ABSTRACT

Smoking is considered the main avoidable cause of death and the most important public health risk. The hazards of tobacco affect not only smokers, but also non-smokers who are exposed to cigarette smoke. In this study, the researchers are focus on the contributing factors to the smoking habit among the students. The purpose of this study is to examine how environment lead to the smoking habit among students, to examine whether social factor lead to the smoking habit among students, to determine whether psychology influence to the smoking habit among students, to identify whether people addiction influence to the smoking habit among students and to examine the most influence factor that lead to smoking habit. For this study, a convenience sampling technique was used and the target respondent is the Tun Mamat college student itself. The sample size of this study is 127 students and consists of students from various parts and also consists of students from various faculties. Based on finding, the correlation analysis shows that all the variables shows positively significant relationship with the dependent variable which is the perception on the smoking habit among students. While multiple regression indicates that all the variables is significantly influential in relation to the contributing factors to the smoking habit among students. However, the finding indicates that people addiction is the most contribution factor lead smoking habit and it have a positive relationship with smoking habit when ($r = .616, p > .05$).

CLEARANCE FOR SUBMISSION OF THE RESEARCH PROPOSAL BY THE SUPERVISOR

Name of Supervisor : PUAN SULIANA BINTI ARIFIN

Title of Research Report : THE CONTRIBUTING FACTOR TO THE SMOKING HABIT
AMONG STUDENTS: A CASE STUDY AT TUN MAMAT
COLLEGE, MELAKA

Name of Student I : AMAR MARTIN BIN RAHIMI

Name of Student II : MOHAMAD SHAFRIEN BIN SAM

I have reviewed the final and complete research proposal and approve the submission of this report for evaluation.
