ACKNOWLEDGEMENT

This masterpiece would never be completed without the most gracious and the most merciful with selawat and Salam to Prophet Muhammad S.A.W. Alhamdulillah, thanks to ALLAH S.W.T for blessing me with his merciful for a good health and wellbeing that were necessary for me to complete this study. In tandem of help and permission of ALLAH, a lot efforts and hard working in doing this research, I was granted the chances to complete this study successfully.

I place on record, my sincere thank you to my beloved advisor which is Madam Fathiyah Binti Ismail, lecturer of the Faculty, for the encouragement extended and endless support as well as guidance. I am extremely thankful and indebted to her for sharing expertise, sincere and valuable information in doing the research. Again, a million thanks towards her for being so nice, patient and kind in dealing with my queries and problems during this semester. Not only that, also thanks to Associate Professor, Dr Azemi Che Hamid, as my second examiner for sparing time and continuously support my research paper.

This research would never be completed if there are no continuous support from the person nearby me especially my family, my friends and everybody who get involved in completing this study. I would like to portray my highest gratitude to both of my parent in providing endless moral support and covering up the expenditure spent during and after completing this research.

As a conclusion, I hope this research could bring a lot of benefit to all mankind as a personal, community or even worldwide effect. This countless appreciation also dedicated to everyone who involved directly and indirectly in completing this research.

ABSTRACT

This research is to define the factors that can influence the price of crude palm oil in Malaysia. The link between crude palm oil prices that can be used is macroeconomics factors. This will improvise the result of this study. The main objectives of this research are to identify the factors that can influence the price of CPO in Malaysia and to determine the most influential factor of CPO price. This research is using time series method since this study is from 1980 until 2017, which is comprises 38 years. All the data obtained be standardize in annually. The dependent variable is CPO price and independent variables used are production, import, inflation and gross domestic product. All determinants are determined to have a positive relationship with CPO price in Malaysia

Key words: Factorization, crude palm oil, Malaysia
