**ORGANIC PATTERN IN PAINTING  
IN ART EDUCATION**

**TALFIZA BINTI TAUFIK**

Thesis submitted in fulfillment of the requirements  
for the degree of  
MA In Art Education

**Faculty of Education**

**November 2010**

## **Abstract**

Of late, people are ignorant of organic pattern in painting in art education. A combination of color, surface and materials have been shown in this form of artwork. This research explored the use of organic and abstract images that are taken from nature and natural resources into the mixed media work. The research further explained about the process and production of an interesting and attraction piece of artwork in organic pattern. The focus of this study is to have a deep understanding in exploring organic pattern in painting in art education. The experimental research will shows how to produce an organic art piece in different way, style and techniques based on the model of art education theory. Based on the above studies and research, the researcher produces artwork reflecting the contents of studies as in this compilation.

## **Acknowledgement**

First and foremost, I would like to wish my special thanks and express my gratitude to the program coordinator of ED722 cum my supervisor, Associate Professor Dr. Abdul Shukor bin Hasihim and also to my external supervisor Associate Professor Dr. Rashidi Yan Ahmad. Their assistance, support, constructive comments, criticisms and suggestions were my most valuable resource to complete the thesis.

Not forgetting to The Ministry of Education, that has granted me the financial support for me to complete the 4 semesters study. My deepest gratitude is to my parents, Hj. Taufik B. Hj. Mustafa and Hajjah Normah bt Madon, my lovely husband Major (Ust.) Hishamudin B. Ibrahim for consistently providing an inspiring and conducive atmosphere. There were times when quitting seemed to be the best options, but their love made me carry on. My thanks to all my colleagues Azzyati Ismail, Rozmiza Hassan, Mastiena Masood and Rozidalina Abdullah for their kind helps.

Finally, I would like to extend my deepest appreciation to all who have contributed in one way or another to the success of this thesis. To all of the above, I offer a deep Japanese bow, An Irish tip of the hat and a hearty Chinese toast. My thanks are due to Allah, The Almighty, The Merciful, The Benevolent. His grace alone brings succor.

## DECLARATION

I, Talfiza Binti Taufik, hereby, declare that:

- i. This work has not previously been accepted in substance for any degree, locally or overseas and is not being currently submitted for this degree or any other degrees.
- ii. This academic project is the result of my independent work and investigation, except where otherwise stated.

## **CHAPTER ONE**

### **INTRODUCTION**

#### **1.0 Introduction**

This chapter discusses organic pattern in general whereby it also highlights the statement of the problem regarding people's limited knowledge in this field. The background of the study is to understand what are organic pattern and the sources that could be derived to create its pattern. By exploring this method it could also provide more comprehensive answers to research questions. The theoretical framework used is the foundation of the study undertaken as it has generated the ideas of utilizing organic material in exploring the patterns, furthermore the significance of the study would emphasize its pertinent of inculcating its value in the education field and not only that the researcher would like to enhance the artistic worth the pattern has to offer. There are four research questions in the study. Operational definitions of the terms used in this study are also provided in order to have a better understanding of the research. It is hoped that the study would be able to lay out its valuable information by exploring organic pattern.

#### **1.1 Background of the Study**

Nature is very accessible to most people and its themes are universal. We know that there are a lot of patterns that could be derived from nature as its existence hold many fascinations. The flow of the pattern in this research is resulted from materials like leaves, seeds, nuts or beans and as well as other natural sources. The research also would use patterns and images that do not come from nature but
