

Universiti Teknologi MARA

The Progress in Development of the 3D Courseware

Mohd Husaiful B Hamzah Shukor

Thesis submitted in fulfillment of the requirements for
Bachelor of Science (Hons) Information System Engineering
Faculty of Information Technology And
Quantitative Sciences

April 2005

DECLARATION

I certify that this thesis and the research to which it refers are the product of my own work and that any ideas or quotation from the work of other people, published or otherwise are fully acknowledged in accordance with the standard referring practices of the discipline

ACKNOWLEDGEMENT

First of all, I would like to thank Allah the Almighty for the strength and health He had given to me in order to complete this project. My highly appreciation to Pn. Wan Nor Amalina Wan Hariri, Prof. Noor Habibah Bt Hj. Arshad, and to all that I didn't name here, especially to this project supervisor Cik Hayati Abd. Rahman for all your patience and valuable guidance rendered towards this project.

Secondly, I wish to convey my love and special thanks to my parents, and especially to my special friends Maisarah Bte Mohd Khalid and Megat Mohd Hafiz for all the moral and financial support from the beginning till the end of this project. Finally, to all my friends and my entire lecturer, who have been helping me constantly, also for the opportunity and all the unconditional support and help they had given me. Thank you all for the support; it is the inspiration of the lifetime.

ABSTRACT

Progress in development of the 3D courseware mean that the increase or decrease of 3D courseware project in year 1999 to year 2005 where is based on information found in nine selected companies in Kuala Lumpur and Selangor area. Progress in development of the 3D courseware is depend on successful project in one company, how many a company get project, type of product and demanding from client. The need of methodology in this research is by collecting primary data and secondary data. Primary data collected by questionnaires give to nine selected companies and secondary data is based on journals, online articles, books and magazines. In this methodology, the collected data from primary and secondary will be analyzed to become information. The finding in this research is concerning on demographic profile company, accomplishment project, skill and knowledge company and demand from client. After get the finding, the summarization of entire research is done and come out with a guideline to developer or other person who want to involve in development on 3D courseware so that developer will produce a successful project.
