ABSTRACT

The main purpose of this research is to assist top management in FTMSK, UiTM to monitor students' results and performances. This research focused on the development of students' grade and assessment analysis system prototype which can give long term benefits to them. This research also concentrates on design, best approach and characteristic for designing DSS and finding the type of analysis used among program coordinator in FTMSK. This application is developed using the open source software such as Apache Web Server, MySQL Database, phpMyAdmin Database Administrator plus with PHP programming language. System Development Life Cycle (SDLC) is selected as the project development methodology. The designing phase is based on research made in literature review and the system prototype is implemented according to the type analysis retrieve from interview. Therefore, this application is really hope can assist top management in monitoring students performances and also can help better than exiting system.

TABLE OF CONTENTS

CONTENT	PAGE
<i>Approval</i>	ii
<i>Declaration</i>	iii
<i>Acknowledgement</i>	iv
<i>Abstract</i>	v
<i>List of Tables</i>	ix
<i>List of Figures</i>	x
<i>List of Appendices</i>	xi
CHAPTER 1	1
1.0 INTRODUCTION	1
1.1 Problem Background	1
1.2 Problem Statement	2
1.2.1 Current System	2
1.2.2 Problem Description	3
1.3 Project Objective	4
1.4 Project Scope	5
1.5 Project Significance	5
1.6 Overview of the Report	6
CHAPTER 2	8
2.0 LITERATURE REVIEW	8
2.1 Introduction	8
2.2 Designing DSS	9
2.2.1 Characteristic of DSS	9
2.2.2 Adaptive Design	11
2.2.3 Color Graphics	12
2.2.4 Best Approach	13
2.3 Web based DSS	14

2.4	Technical Terminologies	15
2.4.1	Programming Language: PHP	15
2.4.2	Web Server: Apache	15
2.4.3	Database: MySQL	16
2.4.4	Database Administrator: phpMyAdmin	16
2.5	Conclusion	16
CHAPTER 3		17
3.0	<i>METHODOLOGY</i>	17
3.1	Introduction	17
3.2	System Planning	18
3.2.1	Preliminary investigation	19
3.3	System Analysis	20
3.4	System Design	21
3.4.1	Structured Design	21
3.4.2	Interfaces Design	23
3.5	System Implementation	24
3.5.1	System Development (Coding)	25
3.5.2	Testing	25
3.5.3	Documentation	25
3.6	System Operation and Support	26
3.7	Summary	26
CHAPTER 4		27
4.0	<i>RESULT AND ANALYSIS</i>	27
4.1	Introduction	27
4.2	Interview	27
4.3	Analysis from Interview	28
4.3.1	Current System	28
4.3.2	Range mark for grading schema	29
4.3.3	Type of analysis and report detail	30
4.3.4	Meeting in "Mesyuarat Lembaga"	32
4.3.5	Decision making in "Mesyuarat Lembaga"	32
