ABSTRACT

The project known as “The Most Interesting Places in Malaysia Multimedia Interactive Presentation” has been chosen to be carried out and implemented during the new technology era in this 21st century because of a few important facts that lead us as a Malaysia citizen have to do in supporting the growth of Malaysia economy. Although there are a lot of the web based information on tourism that available on the internet nowadays, we still need other way which can get more interest from the people all over the world, especially to introduce Malaysia to who doesn’t know the existing of small country known as Malaysia in this world.

Because of the project is a multimedia interactive based and supporting the element that can introduced Malaysia to the people, it present the information about the most popular interesting places and activities in Malaysia by integrating the elements of text, pictures, audio, animation and video to get the people interaction in the most interactive way.
