ABSTRACT

The users of tmsk website have to repeatedly sign in to use a different application. The user will also need to remember their login id and password. This project will overcome this problem by eliminating the user need to multiple sign in and remembering long password. Instead of typing their login id the user will use the UiTM smart card. The user login identification and password will be recognized using the UiTM smart card barcode where an application will detect them to connect the user to the single sign on environment.

This project recognized the user using the UiTM smart card barcode. The user information is stored in a database. An application will identify the user identification and password. The user login id and password for the application they requested will be send to the application they requested it exist in the environment.

Keyword: user access, Internet application

TABLE OF CONTENTS

CONTENT	PAGE
ABSTRACT	iv
LIST OF FIGURES	viii
LIST OF TABLES	viii
CHAPTER I: INTRODUCTION	
1.1 Introduction	1
1.2 Project Background	1
1.3 Project Aims	2
1.4 Project Objectives	2
1.5 Problem Description	2
CHAPTER II: LITERATURE REVIEW	
2.1 Single Sign On Environment Using UiTM Smart Card (Barcode)	3
2.2 Single Sign-On Environment And Its Advantages	3
2.3 Smart Card And Its Uses	4
2.4 Barcode As an Authentication Mechanism	5
2.5 Other Tools For Single Sign On	7
CHAPTER III: METHODOLOGY	
3.1 Introduction	9
3.2 Hardware Requirement	9
3.3 Software Requirement	9
3.4 Data Collection	10

CONTENT	PAGE
3.4.1 Primary Source	10
3.4.2 Secondary Source	10
3.5 System Design	10
3.6 Gantt Chart	12
3.7 Network Diagram	13
3.8 Milestones And Deliverables	13
3.9 Work Break Down Structures	14
3.10 Expected Outcomes And Deliverables	14

CHAPTER IV: DESIGN AND IMPLEMENTATION

4.1 Introduction	15
4.2 Database Design	15
4.2.1 Normalization	15
4.2.2 Entity Relationship Diagram	16
4.3 Flowchart	17
4.4 Data Flow Diagram	18
4.4.1 Context Diagram	18
4.4.2 Diagram 0	19
4.5 Menu Hierarchy	20
4.6 Interface Design	21
4.6.1 Login Page	21
4.6.2 Main Page	22
4.7 Code Design	23
4.7.1 Pseudo Code	24

CHAPTER V: RESULT AND ANALYSIS

5.1 Result	24
5.2 Analysis	24
