Thesis Title : Computer Game Approach For Children With Autism Spectrum Disorder: Their Engagement And Social Communication Skills
Signature Of Student :
Date : October 2015

ABSTRACT

Autism Spectrum Disorder is characterized in three different areas by difficulties in social interaction, communication and repetitive behavior. Children with Autism Spectrum Disorder faced with difficulty in the communication skills area, which impacts their social world. Findings suggest that technology and computer devices are helpful educational aids for students with Autism. This research ongoing agenda is to find ways to design and develop an educational game on iOS platform and to test and evaluate of the effectiveness of this game. The research reported here involved 14 children with ASD, these students had problem in social communication areas and they showed improvement in social communication skills and user engagement after ten testing sessions in duration of two weeks. This research's aim was to investigate each individual child's problem regarding communication by means of design and develop an application for this purpose. By combining suitable components to engage the player and traditional psychological methods as a therapy purpose, use of proposed game encourages players to learn new things while they are working with technology. The results of this research demonstrate that the game that have been designed and developed based on the limitation of participants can promote communication skills in student and engage them in working with technology. The findings from this study reveal practices surrounding the use of computer game approach in therapy sessions and highlight important considerations for design, develop and evaluation of games which has been developed for children with Autism.

CONFIRMATION BY PANEL OF EXAMINERS	ii
AUTHOR'S DECLARATION	iii
ABSTRACT	iv
ACKNOWLEDGEMENT	v
TABLE OF CONTENTS	vi
LIST OF TABLES	xi
LIST OF FIGURES	xii

CHAPTER ONE: INTRODUCTION

1.1	Background Of Study	1
1.2	Initial Study	3
1.2.1	Preliminary Study 1	4
1.2.1.1	What Is An Acceptance Technology	4
1.2.2	Preliminary Study 2	7
1.2.2.1	Why A Game	7
1.2.3	Preliminary Study 3	7
1.2.3.1	What Is The Main Problem With Asd Children	8
1.2.3.2	What Are The Specific Other Problems With Asd Children	8
1.2.4	Preliminary Study 4	9
1.2.4.1	What Is The Correct Age Ranging	11
1.2.4.2	Who Are The Participants	13
1.2.4.3	Questionnaire For Parents	14

1.3	Problem Statement	16
1.4	Research Objectives	18
1.5	Research Questions	18
1.6	Scope And Limitation Of Study	20
1.7	Significance	21
1.8	Research Framework	21
1.10	Contribution Of The Study	22
1.11	Overview Of Thesis Structure	23

CHAPTER TWO: LITERATURE REVIEW

2.1	Introduction	24
2.2	About Autism	24
2.2.1	Types Of Autism	25
2.2.2	Psychological Methods For Children With Asd	25
2.2.2.1	Applied Behavioral Analysis Method	26
2.2.2.2	Occupational Therapy	26
2.2.3	Autism And Communication	27
2.2.3.1	Communication And Modes Of Communication	28
2.3	Autism And Technology	28
2.3.1	Low Technology For Autism	29
2.3.2	Mid Technology For Autism	30
2.3.3	High Technology For Autism	30
2.4	Examples Of Different Types Of Assistive Technology	30
2.4.1	Video Modeling	31
2.4.2	Online Video Game	31
2.4.3	Computer Game	32
2.4.3.1	Serious Game	33
