ACKNOWLEDGEMENT

“In the name of ALLAH S.W.T. the Most Beneficent and Most Merciful”

Alhamdulillah. Thanks to The Almighty whose guidance, helps, and grace was instrumental in making this project and also this report a reality. First of all, I would like to express gratitude to my supervisor, Mr Ahmad Zambri bin Shahuddin for his inspirational contributed and encouragement.

.I also wants to express my honestly thanks to the HEP staffs, Puan Arifah for giving me information to complete my thesis

Thank you so much to my friends who had helped me since the first day I start doing this thesis. Without their graciousness, expertise, and generosity, this thesis would not have been possible

Also included in this list of appreciation and respect to my beloved parents, who is very generous and give me many guidance and support. Your caring support did not go unnoticed.

May Allah give all of you due rewards, in this life as well as in the here after. Insya-Allah. Thank you.

ABSTRACT

Design and Implementation of Society and Club Management in UiTM is the name of the system. This system is basically develops for student in UiTM. The system is developed due to the problem that arise using manual information and difficult to know what activity that society and club to do. As for the solving this problem, design and implementation of society and club management system need to build as the objective is to give more benefit to the students and helping them in getting information faster and efficient. The users of this web site are student, HEP staffs and system admin that have different level of user. The components of this system include forum, sms, and messages board. The system enable and easy of management of student activity. Data and information have been collected by doing research, interview, and study from book and internet. This web site used a methodology called System Development Life Cycle (SDLC) was applied in this system. This system also integrates several software packages and programming languages suitable for the development process. Finally, it is hope this web site would greatly benefit to all people who involve with it.
