ABSTRACT

Sustainable is a way for the building industry to move towards achieving sustainable development, taking account to environmental and social to different priorities. This research presents the level of awareness among contractors area Selangor and Kuala Lumpur. So the study in the implementation on sustainable principles is encouraged to get their response and to know the level of knowledge about the level of awareness in sustainable construction among contractor. Data was collected by questionnaire. Result from my analysis that can be conclude that contractors are lack of awareness about Sustainable Construction issue. Only contractor upper grade just understand about sustainable construction different with the contractor lower grade. Sustainable construction seeks for proper management of all aspect of building design, construction, operation, and use. The principle in sustainable construction should be implement by contractors for ensure that for a better living. Contractors should have positive support the efforts towards providing environmental friendly.

A STUDY ON AWARENESS LEVEL OF CONTRACTOR TOWARDS SUSTAINABLE CONSTRUCTION

	TABLE OF CONTENTS	III
	LIST OF TABLES	VII
	LIST OF FIGGURES	IX
	LIST OF APPENDICES	XI

CHAPTER	TITLE	PAGE
	1.0 INTRODUCTION OF RESEARCH	
1.1	Introduction	1
1.2	Problem Statement	4
1.3	Objective Of Study	5
1.4	Scope Of Study	6
1.5	Research Methodology	7
	2.0 LITERATURE REVIEW ON SUSTAINABLE CONSTRUCTION	
2.1	Introduction	9
2.2	Local Agenda 21 Programmes on Sustainable Construction	11
2.3	Definition of Sustainable Construction	14
2.4	Field Guide For Sustainable Construction	16
2.5	Principles Issues on Sustainable Construction and the rationale	19
2.6	Summary	21

3.0 CONSTRUCTION VIEW AND ROLES OF CONTRACTORS

3.1	Introduction	22
3.2	Types Of Construction Projects	23
3.2.1.	Building Construction	23
3.2.2	Heavy Construction	24
3.2.3	Industrial Construction	24
3.3	Application of Sustainable Principle in Construction Process At Every Stage	25
3.3.1	Design Stages	25
3.3.2	Tender Stage	25
3.3.3	Construction Stages	26
3.3.4	Operation Stages	26
3.3.5	Post-operation Stages	27
3.4	Components for Sustainable Construction During Construction Process	28
3.4.1.	Site	28
3.4.2	Water	28
3.4.3	Energy	29
3.4.4	Human Factor	29
3.4.5	Materials	30
3.4.6	Waste	30
3.5	Contractors In Malaysia	31
3.5.1.	Contractors Criteria	32
3.5.2	Contractors Grade	33
3.5.3	Contractors Registration	33
3.6	Principal Contractors: Roles And Responsibilities	35
3.7.	Others parties are involved in the Construction industries	37
3.7.1.	Authority	37
3.7.2.	Legal considerations	38
3.8	Summary	38

4.0 CASE STUDY/ DATA COLLECTION

4.1	Introduction	39
4.2	Identify the objective and mission of the research	40
4.3	Scope Of Study	40
4.4	Literature review	41
4.5	Data collection	41
4.51	Questionnaire	41
4.6	Data Analysis	48
4.6.1	Background Information	48
4.6.2	Identification Of Sustainable Knowledge	49
4.6.3	Study On Level Of Awareness	49
4.6.4	Identify Contractors Rate Of Benefits and Comment	51
4.6	Summary	52

5.0 DATA ANALYSIS AND FINDINGS

5.1	Introduction	53
5.2	Analysis data for section A	58
5.3	Analysis data for section B	61
5.4	Analysis data for section C	67
5.4.1	Analysis due to the site	69
5.4.2	Analysis due to the water	71
5.4.3	Analysis due to the energy	74
5.4.4	Analysis due to the materials	77
5.4.5	Analysis due to the waste	79
5.4.6	Analysis due to Human Factors	82
5.5	Analysis data for section D	84
5.6	Summary	87
