ABSTRACT

The research is discovering the problems with manual inventory management and the solution proposed to solve the problems for the stakeholder, Norijah's Bakery. The research is focusing on the inventories used in the organization, which consist of the items and ingredients used by the bakery in their daily business process. The purpose of conducting this research was to solve the problems and issues of inventory management of the stakeholder. There were so many problems arises and failure in manual inventory management such as unorganized business flow, inventories spoilage and loss of data. The system was created to help the owner smoothen the business process besides ensuring the security of the company's assets. Besides, the system is developed using the Waterfall Model of the Software Development Life Cycle by implementing the three important stages which is requirements gathering, system design and implementation. This system also built as a standalone software using Java as the programming language. It is built as standalone software because it will be used only in the stakeholder store. The system also gives user a great experience in viewing the system interfaces and use the system. After the research is done, the deliverables at each stage is achieved. Some of the findings are such as the System Requirement Specification(SRS), Software Design Document(SDD), and the system design. Even though this research has been completed, there still a lot of enhancement can be done. This research can be improved by widen the scopes of the research by including the sales, products and machinery of the inventory management as inventory management field is big. With the scopes widen, the functionalities of the system can be increased. As a conclusion, this research is proved to be beneficial to the stakeholders.

ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENT	vi
LIST OF FIGURES	x
LIST OF TABLES	xii
 CHAPTER ONE: INTRODUCTION	 1
1	1
1.1 Background of Study	1
1.2 Problem Statement	3
1.3 Research Objectives	4
1.4 Research Scope	4
1.5 Research Significance	5
1.6 Expected Outcomes	6
1.7 Research Outline of the Thesis	6
 CHAPTER TWO: LITERATURE REVIEW	 8
2	8
2.1 Food Industry	8
2.1.1 Overview of Bakery	10
2.2 Overview of Inventory	12

2.2.1	Bakery Inventory	14
2.2.2	Inventory Management	15
2.3	Inventory Management System	17
2.4	Related Works	20
2.4.1	Enterprise-Wide Hospital Bed Management System	20
2.4.2	Inventory Management System for Sensormatic Electronics	22
2.4.3	Inventory Management System for Hashem Contracting and Trading Co	26
CHAPTER THREE: METHODOLOGY		29
3		29
3.1	Development Methodology	29
3.2	Requirement Gathering and Analysis	31
3.2.1	Gather Requirements	32
3.2.1.1	Interviewing Users and Other Stakeholders	32
3.2.1.2	Observing and Documenting Business Process	33
3.2.1.3	Research Vendor Solution	34
3.2.2	Analyze Requirements	34
3.2.3	Document the Requirements	35
3.3	System Design	35
3.3.1	Implementation	36
3.4	Hardware and Software Requirements	36
CHAPTER FOUR: RESULTS AND ANALYSIS		38
4		38
4.1	Requirement Gathering and Analysis	38
4.1.1	Requirement Model	40
