AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any other degree of qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Thesis Title : Islamic Value Sensitive Design for Psychology Clinic
Information System
Signature of Student : 
Date : September 2013

ABSTRACT

The existing system used by the Hospital Universiti Sains Malaysia (HUSM) Psychology Clinic infringes on several values of both the direct and indirect stakeholders of the system. Most alarmingly, patient's privacy is violated due to the insufficient control on who can access the patients' files. Because psychologists are ethically bounded by their profession to put the highest care on safeguarding the privacy of these psychological progress notes, a migration to a more secure system was decided. This new system's major concern is to make sure the values of the stakeholders are addressed. In order to do this a design methodology that highlights how to embed values into the system itself, Value Sensitive Design (VSD) was chosen. VSD argues that a focus on values needs to be done even before the design stage of the system development. It recommends that direct and indirect stakeholders be identified, the values important to them recognized and reference is made to works in philosophy and ethics in order to define how the values should be managed. This study extracted the definition of values from Islamic traditions of Qur'an and Sunnah and combined it with design suggestions by system design literatures to design and develop a prototype that managed to address the ethical concerns of the stakeholders. From the study, an Islamic Value Sensitive Design (IVSD) model was formed, which is an extension of the existing methodology of Value Sensitive Design. This IVSD model can be beneficial for any future study that wants to address ethical issues from an Islamic perspective. The prototype has shown that the IVSD model can be used to develop a system that embeds Islamic values in its construction which also addresses users' needs and concerns.

TABLE OF CONTENTS

	Page
AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENTS	iv
TABLE OF CONTENTS	v
LIST OF TABLE	ix
LIST OF FIGURES	x
CHAPTER ONE: INTRODUCTION	1
1.1 Introduction	1
1.2 Problem Statement	2
1.3 Objectives	3
1.4 Scope	3
1.5 Significance of Research	3
CHAPTER TWO: LITERATURE REVIEW	5
2.1 Information System	5
2.2 Information System Design	5
2.3 Ethical Issues of Information System	6
2.4 Professional Code of Ethics	8
2.4.1 Software Engineering Code of Ethics and Professional Practice	8
2.4.2 ACM Code of Professional Ethics	10
2.4.3 American Psychological Association's (APA) Ethical Principles of Psychologist and Code of Conduct	12
2.4.4 Effectiveness of Code of Ethics	13
2.5 Ethical Information System Design	14
2.5.1 Participatory Design	15
2.5.2 Effective Technical and Human Implementation of Computer-based Systems	16
2.5.3 Value Sensitive Design	16
2.6 Islamic Ethics	18
2.6.1 Analysis of ACM Code of Ethics from Islamic Perspectives	19
2.6.2 Islamic Ethics in Software Engineering	19

2.7	Islamic Value Sensitive Design	20
2.7.1	Islamic Perspectives on Human Values	20
2.7.2	Human Welfare	20
2.7.3	Ownership and Property	21
2.7.4	Privacy	22
2.7.5	Freedom from Bias	22
2.7.6	Universal Usability	23
2.7.7	Trust	24
2.7.8	Autonomy	24
2.7.9	Informed Consent	25
2.7.10	Accountability	25
2.7.11	Identity	25
2.7.12	Calmness	26
2.7.13	Environmental Sustainability	26
2.8	Psychology Clinic Softwares in the Market	27
2.8.1	TheraQuick	27
2.8.2	BMCase Case Management Software	27
2.8.3	TheraphyNotes	28
2.9	Conclusion	28
CHAPTER THREE: METHODOLOGY		30
3.1	Introduction	30
3.2	Research Approach and Methodology	31
3.2.1	Knowledge Acquisition	31
3.2.2	Analysis	31
3.2.3	Design	32
3.2.4	Implementation	32
3.2.5	Testing	33
CHAPTER FOUR: VALUE SENSITIVE DESIGN ANALYSIS OF SYSTEM		34
4.1	Value Sensitive Design Analysis	34
4.2	Conceptual Investigation	34
4.2.1	Stakeholders Identification	34
4.2.2	Values Identification	37
4.3	Empirical Investigation	38
