## CONFIRMATION BY PANEL OF EXAMINERS

I certify that a Panel of Examiners has met on 21st October 2015 to conduct the final examination of Mohamed Saladin Bin Abdul Rasool on his Doctoral of Philosophy thesis entitled “Proposing a non-monetary Islamic index for poverty measurement At Lembaga Zakat Selangor (LZS), Malaysia” in accordance with Universiti Teknologi MARA Act 1976 (Akta 173). The Panel of Examiners recommends that the student be awarded the relevant degree. The panel of Examiners was as follows:

Rosalan Ali, PhD  
Professor  
Faculty of Business and Management  
Universiti Teknologi MARA  
(Chairman)

Hassan Bahrom, PhD  
Associate Professor  
Centre for Islamic Thought and Understanding  
Universiti Teknologi MARA  
(Internal Examiner)

Naziruddin Abdullah, PhD  
Professor  
Department of Postgraduate Studies  
Universiti Kuala Lumpur (External Examiner)

Rafiqul Islam Molla, PhD  
Professor  
International Islamic University Chittagong, Bangladesh (External Examiner)

**SITI HALIJJAH SHARIFF, PhD**  
Associate Professor  
Dean  
Institute of Graduates Studies  
Universiti Teknologi MARA  
Date : 11th January, 2016

## AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Postgraduates, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Mohamed Saladin Bin Abdul Rasool  
Student I.D. No. : 2009498792  
Programme : Doctor of Philosophy (Islamic Economics)  
Faculty : Business Management  
Thesis Title : Proposing a Non-monetary Islamic Index For Poverty  
Measurement at Lembaga Zakat Selangor (LZS), Malaysia

Signature of Student :  .....

Date : January 2016

## ABSTRACT

In practice, most zakat organizations in Malaysia use the monetary approach in measuring poverty through the conventional Poverty Line Income (PLI) method, and recently the *had al kifayah* (HAK) approach was adopted by zakat institutions. The main aim of the present study is to present a multidimensional poverty measurement from an Islamic perspective as an alternative to the current monetary measurement. The study proposes an Islamic Poverty Index (IPI) which consists of non-monetary indicators comprising of *maqasid-al shariah* (objective of religion) elements, namely, religion, knowledge, physical self, offspring and wealth. The respondents of this cross-sectional study were recipients of zakat aid from Selangor Zakat Board (LZS), which has the highest zakat collection in Malaysia. The two main phases involved in the study are the development of a questionnaire as the research instrument and the data collection stage. An expert review was conducted to develop the questionnaire and the data collection was carried out through a survey aided by a structured questionnaire on selected heads of poor households using the proportionate sampling method in the state of Selangor, the most populated state (with the highest number of Muslims) in Malaysia. In achieving the objectives of the study, data collected from 258 respondents were analyzed using various statistical methods, namely, descriptive statistics (frequency tables and cross tabulation), comparative mean analysis (T test and ANOVA), correlation analysis and regression analysis. The results of the study revealed that there were five dimensions of IPI with thirteen indicators incorporating *maqasid-al shariah* principles with religion and physical self being the highest weighted dimensions, followed by knowledge, offspring and wealth. In addition, there was a significant correlation between both of the monetary dependent variables. However, PLI was not significantly correlated to both of the monetary dependent variables. The study also found out that the number of respondents who were poor in all the three poverty measurement employed in this study was relatively small. Furthermore, the determinants of each of the three dependent variables were also identified. As a summary, the proposed IP in the present study would be able to reflect the multidimensional phenomenon of poverty in a more holistic way and is expected to have an impact on zakat organizations as it gives a new perspective on measuring poverty.
