December 2016

ABSTRACT

The relationship and causality direction between electricity consumption and economic growth is an important issue in the fields of energy economics and policies towards energy use. Extensive literatures has discussed the issue, but the array of findings provide anything but consensus on either the existence of relations or direction of causality between the variables. This study extends research in this area by studying the long-run and causal relations between economic growth, electricity consumption, labor and capital based on the neo-classical one sector aggregate production technology model. The study uses electricity consumption and real GDP measures the economic growth of these countries. These relations are analyzed for ASEAN countries as a whole and also for a group of six ASEAN developing countries. The analysis is conducted using advanced panel estimation approaches. The Westerlund co-integration test and panel Auto Regressive Distribution Lags (ARDL) estimation technique found no long run co-integration in both groups. Results from the panel Granger Causality method found no causality in the short run between energy consumption and economic growth in all ASEAN countries' groups. However, in the long-run, the results indicate that there are bidirectional relationship in group of all ASEAN countries. This study provides supplementary evidences of relationship between electricity consumption and economic growth in ASEAN countries.

ACKNOWLEDGEMENT

Firstly, I wish to thank God for giving me the opportunity to embark on my Master and for completing this long and challenging journey successfully. My gratitude and thanks go to my supervisor Dr. Arlinah Abd. Rashid, and co-supervisor, Dr. Azlina Hanif. Thank you for the support, patience and ideas in assisting me with this project. I also would like to express my gratitude to the staff of the Faculty of Business and Management, Centre for Postgraduate & Professional Studies and Arshad Ayub Graduate Business School (AAGBS) for providing the facilities, knowledge and assistance.

My appreciation goes to the Universiti Teknologi MARA and Ministry of Education who provided the scholarship assistance. Special thanks to my colleagues and friends for helping me with this project.

Finally, this thesis is dedicated to my very dear father and mother for the vision and determination to educate me. This piece of victory is dedicated to all of you. Alhamdulillah.

LIST OF FIGURES	x
LIST OF ABBREVIATIONS	xi
CHAPTER ONE: INTRODUCTION	1
1.1 Background of the Study	1
1.2 The Association of Southeast Asian Nations (ASEAN)	4
1.2.1 Economic and Electricity Outlook in ASEAN countries	6
(a) Brunei	9
(b) Cambodia	10
(c) Indonesia	11
(d) Lao P.D.R.	12
(e) Malaysia	13
(f) Myanmar	14
(g) Philippines	15
(h) Singapore	16
(i) Thailand	17
(j) Vietnam	18
1.2.2 ASEAN Energy Cooperation	20
1.2.3 ASEAN Power Grid (APG)	21
1.3 Problem Statement	22
1.4 Research Objectives	24

1.5	Research Questions	24
1.6	Scope of the Study	24
1.7	Significances of the Study	25
1.7.1	Contributions to Body of Knowledge	25
1.7.2	Contributions to Policy Makers	27
1.8	Organization of Study	28
 CHAPTER TWO: LITERATURE REVIEW		 30
2.1	Introduction	30
2.2	Theoretical Literature	30
2.2.1	Harrod-Domar model	31
2.2.2	Solow's Neo-classical Growth Model	32
2.2.3	Endogenous Growth Model	34
2.2.4	Neo-classical one-sector Aggregate Production Technology	35
2.3	Empirical Literature	36
2.3.1	Time-series	39
2.3.2	Panel Analysis	42
2.3.3	Levels of Development	45
2.3.3.1	Developed Countries	47
2.3.3.2	Developing Countries	48
