ABSTRACT

Nowadays, in Malaysia, consideration regarding animal welfare is widening. Animal welfare is not just the physical and psychological term but more adapted to lifestyle. However, the infrastructure for the community especially to animal lovers to their interest is not a great deal. Competitive environment in pet centre or pet shop is getting more intense. Animal welfare is not just about commercializing the animal but to fight for their rights. Therefore, such infrastructure is needed in order to provide education on animal care. Hence, a new iconic eco-green SPCA Animal Welfare Centre at Jalan Sultan Ismail, Kuala Lumpur has been proposed. The aim is to introduce the community to a green design animal centre in Malaysia. It will be a new culture in animal welfare in Malaysia where animal welfare and pet centre is intertwined. Design concept and implementation will act as profoundest study. All the data and details that been collected from research and observation conducted, was use as a parameter in the design process.

CHAPTER 1.0 INTRODUCTION

1.0 INTRODUCTION

Animal welfare is the physical and psychological well-being of animals. The term animal welfare can also mean human concern for animal welfare or a position in a debate on animal ethics and animal rights. Welfare is measured by indicators including behavior, physiology, longevity, reproduction and attitudes towards different types of animal uses. Systematic concern for animal welfare can be based on awareness that non-human animals are sentient and that consideration should be given to their well-being, especially when they are used by humans. These concern can include how animals are killed for food, how they are used for scientific research, how they are kept as pets and how human activities affect the survival of endangered species.

1.1 PROJECT BRIEF

This project is a manifesto towards animal welfare centre. An infrastructure for animal lovers such as veterinary clinic, resource centre, discussion areas, adoption showcase, as well as gathering lounge in order to promote education on responsible pet ownership, care and kindness to all animals. The title of this project is Proposed Interior Design Scheme of Animal Welfare Centre for SPCA at No 25, Jalan Sultan Ismail, 50250 Kuala Lumpur. This centre will received unwanted, homeless or abused animals and provides an adoption programmed, investigation on cruelty reports, humane education, assistance to community animal caregivers, run a dedicated low-cost spay or neuter clinic and provides boarding service to pet owners to leave their pet temporarily.
