ACKNOWLEDGEMENTS

In the course of completing this Final Year Project (KJC 537), I am indebted to the following people for their help:-

- Pn. Janidah Bt. Eman, Head of Faculty of Civil Engineering, who is my advisor for her advices, guidance and her kindness in letting me having access to vital information for this project.
- En. Mohamed Fadzill Bin Hassan, the Executive Chairman of Malay Contractors Association Malaysia, Penang was also very kind in helping me to obtain information about the association's profile, the solution which has been taken and the mission of this association about the development of the bumiputera contractor in the construction industry
- All the respondents who gave the best cooperation in letting me having the most precious data about the problems of bumiputera contractors in the construction industry.

Besides, I also like to express my thanks to my lovely family and friends for their support and helps

In addition, it is lots of thanks delivered to the entire indirect person who has given his/her kind contribution and cooperation for this project

Praise upon ALLAH THE ALMIGHTY that bestowed the strength on me to pursue my ambition.

ABSTRACT

Dilemma of bumiputera contractor is referring the problem that their faced in construction industries. Each year, the number of contractor is increasing but the government projects still remain at the same quantities or become lesser than the previous year. This will give a big competition among them. Besides that, other project has been closed such as Scenic Bridge at Johor where connecting our country to Singapore. That was giving a big impact to bumiputera contractor.

This research will discover about the problem of bumiputera contractor in construction industry other than less government tender and too many contractors. It will show the relationship about the current issues with the problems. Besides that, it also discovers the solutions or recommendation to solve the problems.

Finally, we will knew what is the main problems of bumiputera contractor in construction industry and the solutions (recommendations) to solve the problem.
