

ASSESSMENT OF GIS SPATIAL INTERPOLATION
METHODS IN ESTIMATING RAINFALL MISSING DATA

NORAZIMAH HANI BINTI ISMAIL

2013202606

Thesis submitted to the Universiti Teknologi MARA Malaysia

in partial fulfilment for the award of the degree of the

Bachelor of Surveying Science and Geomatics (Honours)

JULY 2017

DECLARATION

I declare that the work on this project/dissertation was carried out in accordance with the regulations of Universiti Teknologi MARA. The project/dissertation is original and it is the result of my own work, unless otherwise indicated or acknowledged as referenced work.

In the event that my project/dissertation be found to violate the conditions mentioned above, I voluntarily waive the right of conferment of my degree of the Bachelor Surveying Science and Geomatics (Honours) and agree be subjected to the disciplinary rules and regulations of Universiti Teknologi MARA.

Name of Student : Norazimah Hani Ismail
Student's ID No : 2013202606
Project/Dissertation Title : Assessment of GIS Spatial Interpolation Methods in Estimating Rainfall Missing Data.
Signature and Date :

Approved by:

I certify that I have examined the student's work and found that they are in accordance with the rules and regulations of the Department and University and fulfills the requirements for the award of the degree of Bachelor of Surveying Science and Geomatics (Honour's).

Name of Supervisor : Sr. Puan Rohayu Haron Narashid

ABSTRACT

Rainfall is an important data to identify the complete rainfall record at the gauging station. There is an incompleting rainfall data due to various factors such as absence of the observer and the instrument failures. Thus, to fill the gaps of missing observation in data, several techniques were used to predict the missing rainfall data. The aim of this study is to assess GIS spatial interpolation methods in estimating rainfall missing data using Inverse Distance Weighted (IDW), Thiessen Polygon and Kriging in Northern region of Malaysia. Next, the objectives of this study are to generate rainfall spatial interpolation data based on IDW, Thiessen Polygon and Kriging as well as to assess the accuracy of estimated rainfall values for each spatial interpolation methods. The research study area focuses only in the Northern Region of Peninsular Malaysia which is Pulau Pinang, Kedah, Perak and Perlis. In this study, 15 out of 143 rainfall stations with completed rainfall data were estimated with monthly basis. The most suitable method in accuracy for each methods were compared based on Root Mean Square Error (RMSE). Overall the best RMSE is found in IDW on January is (16.691) following by the worst RMSE in Thiessen Polygon on November is (2233.526). However, the RMSE for Kriging is the most consistent by annually. The finding of this study shows that Kriging is the most accurate GIS spatial interpolation method in estimating rainfall missing data. Thus, Kriging Interpolation is possible to be used to improve the conventional methods of estimating rainfall missing data.

CHAPTER	TITLE	PAGE
	DECLARATION	ii
	ABSTRACT	iii
	ACKNOWLEDGEMENTS	iv
	TABLE OF CONTENTS	v
	LIST OF FIGURES	x
	LIST OF TABLES	xi
	LIST OF ABBREVIATIONS	xii
1	INTRODUCTION	
	1.1 Research Background	1
	1.2 Problem Statement	2
	1.3 Aim	3
	1.4 Research Objective	3
	1.5 Study Area	4
	1.6 General Methodology	5
	1.7 Scope of Limitation	6
	1.8 Significance Study	7
	1.9 Outline of the Chapter	7
	1.10 Summary	8

3.6	Data Processing	24
3.6.1	Database Entry	25
3.6.2	Data Processing of Rainfall Data	25
3.6.3	Spatial Interpolation on IDW	25
3.6.4	Spatial Interpolation on Kriging	26
3.6.5	Spatial Interpolation on Thiessen Polygon	26
3.6.6	The Estimate Values of Rainfall Missing Data	26
3.7	The Result in Estimating Rainfall Missing Data for Analysis	27
3.8	Produce Map	27
3.9	Summary	27

4 RESULTS AND ANALYSIS

4.1	Introduction	28
4.2	Implementation of Study	28
4.3	Maps of Rainfall Based on Different Spatial Interpolation Method.	29
4.3.1	Rainfall Map on January 2011 using IDW	30
4.3.2	Rainfall Map on January 2011 using Kriging	31
4.3.3	Rainfall Map on January 2011 using Thiessen Polygon	32
4.4	Estimate Rainfall Values from Different Spatial Interpolation Methods	33
