ABSTRACT

Particleboard (PB) is a composite panel product consisting of cellulosic particles of various sizes that are bonded together with a synthetic resin or binder under heat and pressure. This study was undertaken is to determine the properties of three layer particleboard from oil palm fronds and to evaluate the properties of three layer particleboard from oil palm fronds by using different particle sizes and resin content. With that, this study use the oil palm fronds (OPF) because to reduce the wastage from oil palm biomass and overcome shortage of the wood supply. Experimental three layer PB panel from OPF particles bonded with Phenol Formaldehyde (PF) were produced with two different particle sizes (mm); 0.5/1.0/0.5 and 1.0/2.0/1.0 and two different resin content (%); 9/9/9 and 11/9/11. The results show the panels made with 0.5/1.0/0.5 particle size and 11/9/11 resin content showed better in MOR and MOE compare with other. Internal bond of panel manufactured using 0.5/1.0/0.5 with 11/9/11 was higher compare with panel manufactured using 1.0/2.0/1.0 with 9/9/9 and 11/9/11 resin content. Thickness swelling rate were slightly lower for PB manufactured using 9/9/9 compare 11/9/11.

LIST OF PLATES	ix
LIST OF ABBREVIATIONS	x
ABSTRACT	xii

CHAPTER 1

1.0 INTRODUCTION

1.1 Background of Study	1
1.2 Problem Statement	1
1.3 Objective	2

CHAPTER 2

2.0 LITERATURE REVIEW

2.1 History of Oil Palm Tree	3
2.1.1 Botanical Classification of Oil Palm	6
2.1.2 Growing of Oil Palm Plantation	8
2.1.2.1 Plant	8

	PAGE
2.1.2.2 Flowers	8
2.1.2.3 Fruits	9
2.2 Particleboard	10
2.2.1 Advantage of Particleboard	10
2.2.2 Uses of Particleboard	10
2.3 Adhesive	10
2.3.1 Natural Adhesive	12
2.3.2 Synthetic Adhesive	12
2.3.3 Wood Adhesive	13
2.3.4 Phenol Formaldehyde	13

CHAPTER 3

3.0 MATERIALS AND METHODS

3.1 Particleboard (PB) Making	16
3.2 Three Layer Particleboard Making	17
3.2.1 Raw Material Preparation	17
3.2.2 Chipping	17
3.2.3 Flaking	19
3.2.4 Air Drying	20
3.2.5 Screening	21
3.2.6 Oven-Drying	22
3.2.7 Glue Mixing	23
3.2.8 Mat Forming	24
3.2.9 Cold Pressing	24
3.2.10 Hot Pressing	25
3.2.11 Trimming and Conditioning	26
3.3 Board Evaluation	27
3.3.1 Method of Testing	28

	PAGE
3.4 Procedure Testing Method	29
3.4.1 Determination of Bending Strength	29
3.4.2 Determination of Internal Bonding Strength	32
3.4.3 Determination of Thickness Swelling	34
CHAPTER 4	
4.0 RESULTS AND DISCUSSION	
4.1 Mechanical and Physical Properties	35
4.2 Statistical Analysis of Variance (ANOVA)	37
4.2.1 Effect of Particle Size on Mechanical Properties	38
4.2.2 Effect of Particle Size on Physical Properties	39
4.2.3 Effect of Resin Content on Mechanical Properties	40
4.2.4 Effect of Resin Content on Physical Properties	41
CHAPTER 5	
5.0 CONCLUSIONS AND RECOMMENDATIONS	43
REFERENCES	45
APPENDICES	49
