#### **ABSTRACT**

Alert Notification Service (ANS) on event helps user from UiTM KJM to know events by notifying through their mobile device. With the era of technology of internet, notification alert is need to alert user about surrounding events that is happening in the campus. The objective of this project is to design push notification alert using Firebase Cloud Messaging, to develop Android application that can support push notification from Firebase Cloud Messaging and to evaluate functionality testing and statistical testing on latency of efficiency on event notification for user. This objective made due to the problems of students and lecturers still receiving event alerts manually. The scope of this project is where UiTM KJM was chose as place to implement this project for students and lecturers by implementing Firebase Cloud Messaging technology via mobile application to push notification to device. It also gives the significance of Mobile Application, the technique of push technology and comparison between current mobile push technologies. The method used for the project is focus on Android operating system implementing REST API for basic function of this mobile application. Java language was used for development and for push notification, Firebase Cloud Messaging is implement in this project. Several surveys has been done to students related to events in UiTM KJM and how they received alert regarding events. Two tests has been done to which are functionality testing and statistical testing on latency performance. Based on results of statistical testing on latency, average for Maxis is 2.41 seconds, for Digi is 2.43 seconds and UMobile is 2.11 seconds. This shows that carrier for UMobile received fastest notification between Maxis and Digi. Overall average for latency performance is 2.32 seconds. From the tests and analysis that have been done, it shows that the result is promising for the idea of Alert Notification Service (ANS) on event for UiTM KJM.

# TABLE OF CONTENTS

CONTENT	PAGE
SUPERVISOR APPROVAL	ii
STUDENT DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	
	V
TABLE OF CONTENTS	vi
LIST OF FIGURES	ix
LIST OF TABLES	xi
LIST OF ABBREVIATIONS	xii
CHAPTER 1: INTRODUCTION	
1.1 Project Background	1
1.2 Problem Statement	2
1.3 Project Aim	3
1.4 Project Objectives	3
1.5 Project Scope	3
1.6 Project Significance	3
CHAPTER 2: LITERATURE REVIEW	
2.1 Application Programming Interfaces (API)	5
2.1.1 How does API works	6
2.1.2 Examples of API	6
2.2 Overview of Push Technology	7
2.2.1 Technique of Push Technology	10
2.2.2 Current Mobile Push Technology	14
2.2.3 Differences between four current mobile push technology	17
2.3 Mobile Cloud Computing (MCC)	19
2.4 Mobile Android Platform	19
2.5 Chapter Summary	22

# **CHAPTER 3: METHODOLOGY**

3.	1 Introduction	23
3.	2 Waterfall Model	23
3.	3 Information Gathering and Planning	26
3.	4 Requirement Analysis	28
	3.4.1 Project Timeline	29
3.	5 Design	30
	3.5.1 System Architecture	30
	3.5.2 Flowchart	32
	3.5.3 Use Case Diagram	33
3.	6 Development	34
3.	7 Testing	38
	3.7.1 Functionality Testing	38
	3.7.2 Statistical Testing on latency	40
3.	8 Documentation	42
3.	9 Chapter Summary	42
СНАР	PTER 4: FINDING AND RESULT	
	TTER 4: FINDING AND RESULT  1 Interface Result	43
