ACKNOWLEDGEMENT

First and foremost, I wish to express my blessings and thanked to Allah S.W.T for providing me with the mental and physically strong as well as other positive attributes notably perseverance to complete this challenging research paper. My deepest appreciation to my beloved parents for giving me support to complete this research. Apart from that, special gratitude goes to my research advisor, Mr. Syamsyul bin Samsudin for his guidance, supervision and support. His constructive comments and suggestions greatly assist in the successful completion of this project paper.

I also want to take this opportunity to give my appreciation to all those who assisted in one way or another in the completion of this research paper. Sincere thanks to all my friends for helping me during my hard time to complete this research paper.

ABSTRACT

The objective of this paper is to investigate the impact of foreign exchange currencies towards Malaysian stock market which means Kuala Lumpur Composite Index (KLCI). This study will focus on Kuala Lumpur Composite Index (FBMKLCI) stock price movement. The factors that may influence the stock market price will be observed closely. The dependent variable for this research is Kuala Lumpur Composite Index (KLCI). While the 5 independent variables that have been selected are foreign exchange rates of United States (USD), Japan (JPY), Canada (CAD), Great Britain (GBP) and European Union (EU). The data that has been taken are pooled for 10 years (January 2007 – November 2016). The data is from quarterly data from those years. Total number of observations is 38. The data was obtained from Datastream.

This study used quantitative secondary data which is time series data and multiple regression model represented by the ordinary least squares (OLS). It involves the Malaysian stock price index as dependent variable and the independent variables are USD, JPY, CAD, GBP and EU.

The result of this data has been revealed that only USD, JPY and EU have significant relationship with the Malaysian stock market itself while the other two variables CAD and GBP do not have significant relationship with the KLCI.
