ABSTRACT

A STUDY ON FACTORS INFLUENCING INVESTMENT IN MALAYSIA (1984-2013)

This case study is to examine the factors that influencing investment in Malaysia. There are four objectives of this study which are to study the pattern and trend of total investment in Malaysia, to examine the factors influence the choice of people in making an total investment, to examine the best factors to encourage people make a total investment and to identify the effects of total investment in Malaysian economy. Now days, the investment become important thing to all people because of to have a financial stability. Normally, investor will make a few consideration before starting their investment activities. In addition, this study will help the investor to make a good decision before take a step to make any kind of investment. Besides that, either the individual or firms must know what are the factors that influence investment in Malaysia. The data that represent the investment in Malaysia are collected was Gross Domestic Products, interest Rate, Corporate Tax and Income Tax (Independent variables) while Total investment in Malaysia (Dependent Variable). Instead of that, this study using secondary data to get the results about this study. The result of the study will further explain in this study.
