ABSTRACT

Industry awareness towards health and safety regulations and its implementation is becoming more critical and more pressing particularly on the construction personnel side. This can be seen by the enactments of the Occupational Safety and Health Act 1994, the coverage of which extends to most workplaces in the country. As a result there is increasing of the training and education on occupational safety and health particularly to construction personnel's workforce. This research will try to investigate the major problem and study the safety and health on workplace. This research also covers the study on the factors contributing to accidents & near-misses.

ACKNOWLEDGEMENT

I begin my thankful to Allah S.W.T for His gratitude of giving a good health, good education environment, overwhelming and well peacefulness for me in completing this dissertation.

This dissertation will never complete without the help of several people. Firstly I would like to thank to my beloved parents for their encouragement, supports and especially in financial part.

A special thanks goes to my supervisor, Mr. Mazlan Bin Abu Bakar for his encourages in completing, research help in reviewed the draft and provided valuable and positives comments along the way in completing my dissertation. His guidance and supervision throughout the preparation of this dissertation is much valued.

To all lectures, especially from Building Surveying Department, thank for giving me an extra information and support to complete this required task. All of the supports is very appreciates.

TABLE OF CONTENTS

ABSTRACT	i
Acknowledgement	ii
Table of Contents	iv
List of Charts, Figures and Photos	ix

CHAPTER 1: INTRODUCTION

1.1	Overview of Construction Industry In Malaysia	1
1.2	Issues and Problem	6
1.3	Objective of Research	12
1.4	Scope of Research	12
1.5	Methodology of Study	12

CHAPTER 2: SAFETY & HEALTH IN CONSTRUCTION INDUSTRY

2.1	Introduction	14
2.2	What is safety?	18
	2.2.1 Definition of Occupational Safety	21
	2.2.2 Definition of Occupational Health	21
2.3	Importance of safety	22
2.4	Construction Personnel in Construction Site	23
	2.4.1 Definition of Construction	23
	2.4.2 Definition of Personnel	24
	2.4.3 Definition of construction personnel	24
