BACHELOR OF BUILDING SURVEYING (HONS)

OCTOBER 2009

ABSTRACT

From the early chapters of chapter 1 to chapter 6, I have touched on the conservation and maintenance of a building. Maintenance is very important for particular building houses as traditional Malay houses in many regions around Bagan Datoh, Perak. Conservation also means preserving a heritage or historic remains of a country. All data and information on conservation and maintenance I have refine in chapter 1 and chapter 2. Whereas in chapter 4 I will touch on many sites about the background research I was about traditional Malay house. Many talked about the issues now houses a traditional Malay houses, especially houses that day when his condition worsened. Many steps have been taken by the government to solve this problem. Just look at the state of Malacca and Penang. The houses there have long started to be treated with care by the government because they realize that these old houses have a high value estatik. Back to my study, in chapter 5 of chapter 'Findings and Analysis', I found that most defects that occur in old houses are destroyed. Decay often occurs because the presence of high water in the wood long period of time. So we should have started moving in the strict safeguard of heritage treasures.

<u>CONTENTS</u>	PAGE
CHAPTER 1: GENERAL INTRO	
1.1 Introduction	1-2
1.1.1 Conservation Law in Malaysia	3
1.2 Problem Statement/ issue	4
1.3 Objective	4
1.4 Scope of Study	5
1.5 Methodology	
1.5.1 Data Collection	6
1.6 Chapter Summary	7-10
1.7 Conclusion	10
CHAPTER 2: LITERATURE REVIEW	11-15
2.1 Issue	16-20
2.1.1 Emotional Values	20
2.1.2 Cultural Values	21
2.1.3 Use Values	22-30
2.2 What is Historic Building?	30
2.2.1 Causes of Decay	31-32

2.2.2 Natural Agents of Deterioration And Loss	32-33
2.2.3 Human Factors	33
2.3 What Is Conservation?	34-35
2.4 Preparatory Procedure for Conservation	
2.4.1 Inventories	35
2.4.2 Initial Inspection	36
2.4.3 Continuing Documentation	36-37
2.4.4 Preservation	37
2.4.5 Restoration	37-38
2.5 What Is Traditional Malay House?	39-43
2.5.1 Design Concept	43
2.5.2 Spatial Organization	
i) Sitting and Orientation	44
ii) Interior	47-49
2.5.3 Building Construction and Materials	51
2.5.4 Climatic Control	54-55
2.5.5 Aesthetic	55

CHAPTER 3: METHODOLOGY

3.1 Primer Data

3.1.1 Observation	56-58
3.2.2 Interview	58

CHAPTER 4: SITE BACKGROUND

4.1 Background of Bagan Datoh	59
4.2 Maps	60-63
4.3 Data Collection	
4.3.1 Introduction	64
4.4 Data Collection- House Sample	
4.4.1 House 1: Abandon House	65-68
4.4.2 House 2: Residential House	69-72
4.4.3 House 3: Abandon House	73-76
4.4.4 House 4: Residential House	77-80
4.4.5 House 5: Residential House	81-84
4.4.6 House 6: Residential House	85-87
4.5 Conclusion	88
