STUDENT'S DECLARATION

Academic Project Title:

DEVELOPMENT OF UNDERGROUND STRUCTURE
CASE STUDY: ADDITIONAL CAR PARKING SPACE
AT SOGO COMPLEX

I declare that this final project is the result of my own research and that all sources are acknowledged in the references.

Signature : 

Author's Name : Nur Syaimira Binti Mat Rosli

Declaration Date : 8 / 10 / 2010

ACKNOWLEDGEMENT

On the completion of this final year project, I thank Allah for giving me strength and dignity. I am very grateful to my project academic advisor, Encik Mohamad Isa Bin Abdullah for his invaluable help and guides.

Thank you also to the Coordinator of the Estate Management Department, Sr. Mona Binti Isa, Academic Project Coordinator, Assoc. Prof Sr. Haspalela Binti Mohd Yusof and Puan Salmiah Binti Jaafar. Do not forget also to Encik Mohd Faizal Bin Fuad and others lecturer who helped me in completing this academic project.

Appreciation also to Encik Azman Hazizi Bin Hassanuddin, officer at Department of Town and Country Planning Kuala Lumpur City Hall, Encik Mohd Azua Bin Mohd Zain, officer at the Department of Survey and Mapping and the officer at Lands and Mines Office for their cooperation.

Thanks also to my beloved parents and siblings who always give me support and encourage in conducting my research. I would like to show my appreciation towards all my supporting friends in encouraging and helping me in completing this final year project.

ABSTRACT

Development of underground structures is a rare development in Malaysia. Underground development is often associated with high in development costs. For other countries that have high growth, the development of underground structure has become an option in development. In addition, roads were built below the surface in the various countries. However, in Malaysia the development of underground structure is often seen as the development of car parking space. The development is often built for commercial buildings. Because of this, author want to conduct a research related to the development of underground structure. This research will focus on basic considerations of development of a joint venture between the government and private sectors in relation the development of underground structure. Beside that, the consideration of approval by the authority regarding to the development of underground structure will focus by author. To achieve the objectives of the study, the author will use both survey instruments. This is based on data collection study. Finally, author will proposed a recommendation and conclusion have been made as a result of analysis of data obtained.
