## ABSTRACT

Road passenger transport plays an important role in providing the facilities for conveying people to and from work consistently and without undue delay, to seek recreation and pleasure away from their immediate home surroundings, or for travelling to educational centres and shopping centres.

A passenger transport undertaking has to ensure that a most efficient and reliable service is given to the public. At the same time, it must acquire a maximum fleet utilisation to be able to increase productivity with less cost possible. However, the problem in utilising of fleet is not uncommon and solutions should be found to remedy the situation.

In this thesis, I would like to analyse the problems of fleet utilisation faced by Sri Jaya Kenderaan Sendirian Berhad and to find solutions which I hope would help Sri Jaya Kenderaan Sendirian Berhad to reduce its problems.

## ACKNOWLEDGEMENTS

I would like to convey with my deep gratitude and appreciation to the Personnel Manager of Sri Jaya Kumpulan Berhad, Encik Ismail Ahmad for allowing me to undergo my practical training for six months.

I wish to thank Encik Halim Kamal, the Group Operation Manager, who has supervised my training at the Operation Department and for permitting me to make use of information and data necessary for the completion of my thesis.

I also wish to acknowledge the help received from Encik Samsudin Mohamad (the Operation Manager), Encik Murzamil Mohamad Shariff (the Assistant Operation Manager at Petaling Jaya Depot) and Encik Hakimi Mohamad (the Assistant Planning Manager), for giving the necessary information in preparing my thesis.

I would like to extend my thanks to the drivers and staff of Sri Jaya Company for their friendship and cooperation.

Most of all I would like to thank my Advisor, Puan Sabariah Jemali who has helped and guided me in the completion of this thesis.

Finally, I should like to acknowledge with my deepest gratitude and appreciation to my family who has given me encouragement and support in my studies.
