AUTHOR'S DECLARATION

I declare that the work in this dissertation was carried out in accordance with the regulation of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non- academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Under Graduate, Universiti Teknologi MARA, Regulating the conduct of my study and research.

Name of student : Muhammad Asri bin Mat Yadi
Student I.D. NO. : 2015299084
Programme : Bachelor of Surveying Science and Geomatics (Hons)
AP220
Faculty : Faculty of Architecture, Planning and Surveying
Thesis : Investigation of Road Traffic Accidents in Bandar Kuala
Terengganu Between 2014 to 2016 Using Geographic
Information System (GIS)

Signature of Student

Date : July 2019

Approved by:

I certify that I have examined the student's work and found that they are in accordance with the rules and regulations of the department and university and fulfil the requirement for the award of the degree of Bachelor in Surveying Science and Geomatics (Hons).

Name of Supervisor : Noorazwani binti Mohd Razi

ABSTRACT

According to road accident statistics recorded by the Unit Perancangan Negeri Terengganu (UPENT), the number of road accidents in Kuala Terengganu increases year by year. The number of reported cases in year 2014 is 9383, while in year 2015 is 10381 that show the increase of road traffic cases. In year 2016, the number of road traffic accident increase until reach 10793 cases that has been reported. The aim of this research is to investigate the road traffic accidents cases occurred in Bandar Kuala Terengganu in year 2014 to 2016. The methodology for this study performing of geo-reference and geo-coding of the database. After that, hotspot analysis by using Kernel Density Estimation (KDE) technique to find the most affected area of accident. After that, regression analysis by using Ordinary Least Square (OLS) tools to find the relationship of the factors that most contribute accident cases. This research is based on the investigation of traffic accident and the result of this study will show the hotspot map that will show the most affected area that called hotspot area. The output for the relationship of the road traffic accident will show in the graph form. This study is significant in order to give the information to the Police Traffic Department and Jabatan Kerja Raya (JKR) and this department can take this information for monitoring the accidents hotspots to prevent the injuries and death to the road users.

TABLE OF CONTENT	vii
LIST OF TABLES	x
LIST OF FIGURES	xi
LIST OF ABREAVIATIONS	xii
CHAPTER ONE : INTRODUCTION	1
1.1 Research Background	1
1.2 Problem Statements	3
1.3 Aim and Objectives	4
1.4 Research question	4
1.5 Significant of Study	5
1.6 Scope of limitation of research	6
1.6.1 Scope of Work	6
1.6.2 Limitation and Challenges	7
1.6.3 Study Area	7
1.7 Chapter Outline	9
CHAPTER TWO : LITERATURE REVIEW	10
2.1 Introduction	10
2.2 Road Traffic Accidents	10
2.2.1 Road Traffic Accidents	10
2.2.2 Type of Road Traffic Accidents	11

2.2.3	Type of Road	12
2.3	Geographic Information System (GIS) in Assisting Road Traffic Accidents.	16
2.3.1	Geographic Information System (GIS)	16
2.3.2	GIS Application in Road Traffic Accidents	17
2.4	Meteorological Factor	18
2.5	Spatial Interpolation Tools	18
2.5.1	Road Accident Hotspot Analysis	19
2.5.2	Kernel Density Estimation (KDE)	19
2.6	Regression Analysis	20
2.7	Software and Hardware	21
2.7.1	Software	21
2.7.2	Hardware	22
 CHAPTER THREE : RESEARCH METHODOLOGY		23
3.1	Introduction	23
3.2	Methodology workflow	24
3.3	Data Acquisition	25
3.3.1	Database of Road Traffic Accident	26
3.3.2	Database of Road in Bandar Kuala Terengganu	27
3.3.3	Database of Meteorological	29
3.4	Data Processing	30
3.4.1	Georeferencing the databases	30
3.4.2	Perform geocoding of the database	30
3.4.3	Hotspot analysis (Kernel Density Estimation)	30
3.4.4	Regression analysis (OSL)	32
 CHAPTER FOUR : RESULT AND ANALYSIS		33
4.1	Introduction	33
4.2	Georeferenced Database	33
4.2.1	Dataset of Road Traffic Accident in year 2014	34
4.2.2	Dataset of Road Traffic Accident in Year 2015	36
4.2.3	Dataset of Road Traffic Accident in Year 2016	38
