AUTHOR'S DECLARATION

I declare that the work in this final year project paper was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Undergraduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Muhammad Auquasyah bin Azmin

Student I.D. No. : 2016725935

Programme : Bachelor of Business and Administration (Hons)
Investment Management

Faculty : Business and Management

Thesis : Stock Market Integration and Causality between
Malaysia, United States, Singapore, China and
Indonesia: During and After Financial Crisis

Signature of Student : 

Date : December 2018

ABSTRACT

A number of previous studies (theoretically and empirically) have examined cointegration and causal linkages among the global markets. This study comes across when the global economic event (i.e. financial crisis) gives an impact towards Malaysia stock market integration. The sub-prime financial crisis initially affected the Malaysia economy, however, the recovery in the Malaysia and other Asian countries took place at a much faster pace than during the previous crisis. Thus, due to this context, the purpose of this study is to examines the stock market integration and causal relationship between Malaysia, United States, Singapore, China and Indonesia, focusing on the periods of during and post financial crisis. The selected countries being choose according to the top most emerging stock markets related to Malaysia. Five variables used for this study involving Kuala Lumpur Composite Index (KLCI), Standard & Poor's 500 (SNP500), Straits Times Index (STI), Jakarta Composite Index (JCI) and Shanghai Stock Exchange (SSEI). The entire samples collected from the Datastream from 2007 until 2017. The result of this study reveals that there is a cointegration relationship between KLCI and SNP500, STI, JCI and SSEI imply causality during and post crisis.

ACKNOWLEDGEMENT

I would like to acknowledge and thank the following important people who have supported me, not only during the course of this research paper, but also throughout my Bachelor Degree life.

First and foremost, I would like to express my gratitude to the almighty Allah S.W.T for showering His blessings on me and grant me strength to complete this challenging research paper since the beginning until the end. I would also like to thank Nur Liyana binti Mohamed Yousop my research advisor for her unwavering support and guidance in completing my research paper. Her proper step by step guidance does help me to deepen my understanding in my research topic. In addition, special appreciation and thanks to Dr Roslina Hj Mohamad Shafi for her proper guidance and advice towards the completion of this research paper. Without access to her guidance, this research would not have been possible.

Finally, my deepest gratitude towards my father Azmin bin Osman and mother Siti Munira binti Mamat for showering me with prayers and support during completion of this research paper. Last but not least, all my friends and colleagues for their understanding and moral support through up and downs during the completion of this research paper.
