TABLE OF CONTENTS

CONTENTS	PAGE
SUPERVISOR'S APPROVAL	ii
DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	ix
LIST OF TABLES	x

CHAPTER ONE : INTRODUCTION

1.1	Project Background	1
1.2	Problem Statement	3
1.3	Project Objective	4
1.4	Project Scope	5
1.5	Project Significance	6
1.6	Project Development Framework	7
1.7	Summary	8

CHAPTER TWO : LITERATURE REVIEW

2.1	An Overview of Reservation	9
2.1.1	Reservation Application	9
2.1.2	Web Based Reservation System	10
2.1.3	Similar Existing Reservation System	11
2.2	System Development Model	13
2.2.1	Waterfall Model	14
2.2.2	Rapid Prototyping Model	15

2.2.3	Model View Controller	15
2.3	Web Based System	19
2.4	Database Management System	22
2.4.1	Oracle 11g	22
2.4.2	MySQL	22
2.5	InfoTech in UiTM	23
2.5.1	InfoTech Services	23
2.5.1	Hardware Equipment in InfoTech	24
2.6	Summary	24

CHAPTER THREE : RESEARCH METHODOLOGY

3.1	Research Framework	25
3.1.1	Preliminary study	27
3.1.2	System Analysis	27
3.1.3	System Design	30
3.1.4	Development	31
3.1.5	Evaluation	31
3.1.6	Documentation	32
3.2	Summary	32

CHAPTER FOUR : RESULTS AND DISCUSSIONS

4.1	System Overview	33
4.1.1	System Function	33
4.1.2	System User	34
4.2	System Evaluation	44
4.1.1	Part A: Demographical Information	45
4.1.2	Part B : Analysis of User Interface Satisfaction	46
4.1.3	Part C : Analysis of Usability of The System	47
4.3	Summary	48

ABSTRACT

Web-based applications are programs that run on Web servers and use Web pages as the user interface. The application usage of Internet website and online reservation system are currently dominating the modern information technology which gives many advantages to people. For that reasons, the project entitled "*EQUIPRES*" web based system is developed to ease applicant in making equipment reservation process and administrator to manage equipment reservation for InfoTech UiTM Terengganu. This project is developed using Model View Controller approach. Model View Controller approach, which is design pattern for computer user interfaces applied in web based system design. It divides an application into three areas of responsibility Model, View, and Controller. Reservation system EQUIPRES enables the applicant to register their account, update their profile and make equipment reservation. Besides that, the administration can add staffs, equipment, approve the equipment reservation as well as updating and deleting the records information. This project also will create paperless environment and save time applicant and InfoTech staff to making equipment reservation. Therefore, the interface design and functionality of the EQUIPRES web based system need to be improved.
