Thesis : The Contributions of Economic Sectors to Economic  
Growth in Malaysia.

Signature of Student : .....  .....

Date : December 2018

## **ABSTRACT**

The objective of this study to determine the relationship and the effect that influence of economic sector towards Gross Domestic Product (GDP) growth using the period year from 1987 to 2017. This study consists of five independent variables which are value added of manufacturing sector, value added of services sector, value added of agriculture sector, value added of construction sector and value added of mining sector. It is known that these variables are expected to have significant relationship to the dependent variable. The data has been analyses using Ordinary Least Square (OLS) model.

## **ACKNOWLEDGEMENT**

In the name of Allah, the Most Gracious and the Most Merciful, Alhamdulillah, all praises to Allah for the strengths and His blessing upon completing this project report. This project report was prepared for subject Industrial Training Project Paper (FIN672). I would like to give my special thanks to my advisor Prof. Dr. Omar bin Samat for his supervision, support and his invaluable help of constructive comments and suggestions throughout the project works have contributed to the success of this project. So, I want to take this opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project. The cooperation and support received from my coordinator Madam Nur Liyana binti Mohamed Yousop for this project. It is a blessed to have her constant support and help. Without her cooperation and guidance, this project would not have been materialized. Last but not least, we would like to give our thanks to our parents and people who helped us either directly or indirectly for their cooperation. thanks to all of our friends and everyone, that has been by supporting our work and help during the report project progress till it is fully completed. Thank you.
