ABSTRACT

Malaysia is one of the Asian countries that has increasingly advanced in development of country from year to year in accordance with the passage of time. However, lately urban poverty in Malaysia becomes a phenomenon because of the impacts of the urbanization. The population migration from rural to urban areas also contributed to the acceleration of urbanization. Since the issues of urban poverty has been rise up, it is important to determine the factor that influence of hardcore urban poverty in Malaysia. In this study, the secondary data (Household Income Survey 2012) extracted from Department of Statistic Malaysia (DOSM) was utilized. For this study, the statistical analysis that have been applied are Chi-Square Test of Association, Binary Logistic Regression and Odds Ratio in order to achieve the objectives of this study. Based on the results of the logistic regression, this study found that only marital status of head of households and education level of head of households are the factors that affecting to hardcore urban poverty. As conclusion, there is significant effect towards hardcore urban poverty but in this study only marital status and education level is significant. Therefore, for the future study it needs some improvement. This study should include more variable that may have possibility affect to the hardcore urban poverty

Keywords: Hardcore urban poverty, Poverty Line and Binary Logistics Regression

ACKNOWLEDGEMENT

In the Name of Allah, the All-Compassionate, All-Merciful

Alhamdulillah, thanks to Allah for His grace and guidance for giving us ability and opportunity to complete this study.

We would like to express our deepest appreciation to all those who contributed to the completion of this report title "Demographic Determinants of Urban Poverty in Malaysia". First of all, a special gratitude goes to our learned guides as well as our supervisor, Mrs. Nor Fatimah Binti Abd Razak for her valuable help, guidance, comments and wise advice in the preparation of this report. we are also grateful to respect our helpful coordinator Mrs. Noor Zafarina Binti Mohd Fauzi. Also, a lot of thanks to Department of Statistic Malaysia (DOSM) because give an opportunity and permission to us to use the data for this study. Then, we are feeling to acknowledge to all classmates and our own group members who were always there to help us in sharing their information and give a lot of new ideas about the task. Finally, a greatly thankful to our family for their moral and financial support during the preparation of this report. With all of these commitments and support, it enables us to finalize this report on time
