ACKNOWLEDGEMENT

Assalamualaikum.....

Alhamdulillah, in the name of Allah S.W.T., I have completed this project paper. It would be impossible to complete this research without the help from many parties. Thus, I would like to record my enormous appreciation to everyone who have been involved directly or indirectly in completing this task.

First of all, I would like to express my sincere gratitude and appreciation to my respected advisor, Madam Nik Sarina bt Nik Md. Salleh and second examiner, Dr. Zuhail b. Hussein for their guidance, support, advice and supervision in completing this study. Their constructive comments and advices are valuable in making this study for a success. Not forgetting, my special appreciation to my family too especially my parents for their continuous prayers, support and understanding.

Last but not least, I would like to record my appreciation to all my entire classmates and friends for giving me their support to finish this report. For all their support and guidance, only Allah S.W.T. can repay them. I would not be able to finish this research within the given time without all their precious guidance.

EXECUTIVES SUMMARY

Service recovery action is one of the strategies that is implemented by many companies to recover their service failure toward their customers. The researcher has studied the service recovery action that are provided by TM Point Kuala Krai. There are three strategies involved in this research which are distributive justice, processing justice and interactive justice. The objective of this study is to identify the factors that influence service recovery actions by TM Point Kuala Krai. Besides that, this study is to give suggestions and recommendations to TM Point Kuala Krai on how to improve their service recovery strategy. This study takes an exploratory approach. Exploratory research is conducted by the researcher to obtain greater understanding of a concept or to help crystallize the definition of a problem. The researcher is used non probability technique which it is convenient technique. Convenient technique is the least expensive and least time consuming of all sampling techniques. It is also easy to measure (Malhotra, 2007). Data were gathered from the questionnaires which are distributed to 103 respondents of TM Point Kuala Krai. The data are analyzed by using SPSS through the frequency analysis, reliability test, hypothesis testing and correlation coefficient analysis. From the analysis, the researcher found that distributive justice, interactive justice and processing justice have a significant relationship with the service recovery action provided by TM Point Kuala Krai. From the findings, it shows that **distributive justice** is the most important factor because it has the strongest correlation than the other factors with service recovery. As a conclusion, the researcher has also stated several recommendations. It is a great pleasure if TM Point Kuala Krai evaluates the suggestions from the respondents and the researcher
