# ACKNOWLEDGEMENT

In the name of Allah, the most beneficent, the most merciful. May His blessing and mercy be upon our prophet Mohammad S.A.W. May thank to Allah first and last. I would like to thank several people who have contributed either directly or indirectly to the completion of this thesis. Without supports, advices, helps and sacrifices from and made by those many peoples, it would be impossible to complete this research. Here, I am happy to extend my gratitude to the peoples involved.

First, I want to express my gratitude to my advisor, Puan Siti Maziah Binti Ab.Rahman who has been very supportive and helpful during my candidacy. She has encouraged me to work harder to do my thesis through their supports, interests, and constructive comments. She gave me freedom to explore possibilities, critical feedback and practical suggestions for this thesis. Following her guidance, I started to know how to carry out a thesis. I really appreciate her commitment and tremendous guidance that made the completion of this thesis possible.

Second, I would like to thank Puan Suraya Binti Husin, second examiner, Assoc. Prof. Mohamad Safri Bin Ya, Coordinator Programme of Business Management and all lecturers University Technology of Mara, Kota Bharu Campus for all their support and kind assistance during my study.

I would also like to thank all my fellow friends at University Technology of Mara, Nor Asma Hidayu, Nurul Hafizah, Nor Izati and so many others whose names I have not mentioned here for their assistances, invaluable discussion, suggestions and friendship.

Last but not least, I want to express my sincere gratitude to my lovely mother, Puan Rukiah Binti Jusoh, who has been very supportive, patient and understanding during my study.

She always supports me in whatever I want to do and present the good example in life to me. To my brothers, sisters and their spouses and children, I also would like to express my gratitude for their supports.

And to those that I have not mentioned here, thank you for all your kindness, helpfulness and courage that make it possible for me to complete this project paper. Whatever shortcoming encountered shall remain my imperfection.

May Allah bless everybody

Thank You.

## ABSTRACT

The National Co-operative Policy (NCP) will ensure that the huge resources of the co-operatives can be harnessed to generate and contribute to the economic growth of the country. This study sought to examine the factors that influence the communities to participate in the co-operative. The objectives for this research are to study the relationships between sources of finance, facilities and advice and guidance with the participation in co-operative. Therefore, the population of study will be the members of co-operative in Pasir Mas. One hundred respondents were answer the questionnaire in other to analyze the relationship between dependent and independent variables. For the finding and analysis, the researcher use frequency distribution, descriptive statistics, hypothesis testing, and Pearson Correlation and regression analysis. For overall, the researcher can conclude that the relationship between independent and dependent variables are significant and it will lead the communities to success in the business that the communities' involve.
