ACKNOWLEDGEMENT

Alhamdulillah to Allah S.W.T. and peace is upon his messenger Holy Prophet Muhammad S.A.W. First of all, all praises and thanks to Allah, Lord of al-Mighty, for His Guidance and will, for the revelations of some of His knowledge for me in successful to finish this project. Great thanks to my family who never quit in giving me full support, understanding and courage for me to go throughout doing this project in a short of time and when I have to face a lot of pressure.

This project also would not be possible and successful without the help and support from my supervisor, Madam Noor Ilanie Nordin and my industrial training coordinator, Pn. Siti Nurhafizah Mohd Shafie for her support to complete this study. Thanks to them for giving instructions, advices, motivation, support and guide the flow of this project. Finally, deepest thanks goes to my course colleagues for their help and support each other to strongly continue the project and give a lot of useful advices regarding this project.

Not forgetting, to every employee that willing to share their knowledge and experiences and also give guidance for me in finishing this final year project during my practical training at Jabatan Tenaga Kerja Kuala Terengganu especially to my company supervisors Encik Ros Kazeli Bin Ramli that always give his support and guidance for me to complete this project.

Million thanks to all.

ABSTRACT

The purpose of this study was to identify the factor that most influencing the perception of users toward internet recruitment on JobsMalaysia portal between the three variables selected which are web usability, information provision and user friendliness. This study involved 100 samples from a list of participants that already listed in 'e-Kasih' system as the respondents by using simple random sampling. Data were collected by using the self-administered questionnaires that design by the researcher from the previous study. Multiple Regression method was used to identify the relevant relationship between the variables. The results of the study shows the variables that are significant are information provision and user friendliness meanwhile the variable that is not significant is web usability variable thus it can be concluded that the factors that influencing the perception of users towards internet recruitment are information provision and user friendliness. Furthermore, the result also shows that there is no association between gender and usage history on JobsMalaysia portal.
