ACKNOWLEDGEMENT

Praise to Allah for three months I undergo my internship that begins on September 2014 till December 2014. I finally successfully completed my industrial training report. For the remaining three months more that I have to continue my training in order to complete my course. I pray to Allah hoping my journey is His bliss.

I also would like to extend my thankfulness to the most precious persons in my life which is my parents for never ending reminding me to always be honest and trustworthy during practical training at Perusahaan Otomobil Nasional Sdn Bhd (PROTON). As for my supervisor from Universiti Teknologi Mara (UiTM) Kota Bharu, Dr. Wan Fairos Wan Yaacob, I would thank you for the guidance, teaching and tremendous mentors for me. Last but not least, I would like to extend my appreciation to my industrial supervisor, En Noor Amry bin Abd Aziz for their advices, patiently guiding and persistent help for me while I working at Perusahaan Otomobil Nasional Sdn Bhd (PROTON) as a trainee.

In addition, not forgotten for all staff working at Perusahaan Otomobil Nasional Sdn Bhd (PROTON) especially Department Technical Procurement. I very appreciate for their entire kindness helping and teaching me when I'm working there. I am very lucky to have helpful colleagues at Perusahaan Otomobil Nasional Sdn Bhd (PROTON). Lastly, to all people or individual who had involved for this study either directly or indirectly

ABSTRACT

This research aim to examine how adoption and understanding of green technology innovation is impacted by procurement PROTON'S staff. The study focus on Malaysia automobile manufacturer which is Perusahaan Otomobil Nasional Sdn Bhd where currently embarks smart green technology in its production of car. The objective of the study is to identify the factor that effect the innovativeness of green technology including training, team development, organizational culture and knowledge sharing. All Procurement staffs were selected as a respondent. The department is known as "Department Technical Procurement". This study involved 144 of respondents by using stratified random sampling. Structural Equation Modelling (SEM) approach is used to investigate the relationship among variables. SEM also is a confirmatory method providing a comprehensive means for assessing and modifying the measurement models as well as structural model. The result of independent samples t-test shows there is significant difference of the gender and having hybrid car. Analysis of Variance (ANOVA) shows there is a significant difference of the age, and working experience on innovativeness of green technology. Furthermore, there is significant difference between training and organizational culture. Besides, knowledge sharing is significant on innovativeness of green technology.

Keyword: *Training, Team Development, Organizational culture, Knowledge Sharing, Innovativeness of green technology*
