REPORT
SUBMITTED TO
FACULTY OF COMPUTER AND MATHEMATICAL SCIENCES
UNIVERSITI TEKNOLOGI MARA

AS PART OF REQUIREMENT
FOR
BACHELOR OF SCIENCE (HONS) (STATISTICS)

JANUARY 2015

ACKNOWLEDGMENT

All praises to Almighty Allah, on whom ultimately we depend for sustenance and guidance and the most compassionate His Holy prophet Muhammad (Peace be Upon Him) the most perfect and exalted one among and of ever born on the surface of earth, who is forever touch of guidance and knowledge for the humanity.

I would like to take this opportunity to express my sincere appreciation to my supervisor En. Mohd Azry bin Abdul Malik, whose guidance, careful reading and constructive comments was valuable. His timely and efficient contribution helped me shape this into its final form and I express my sincerest appreciation for his assistance in any way that I may have asked. My special thanks also to the industrial training coordinator, Madam Siti Nurhafizah binti Mohd Shafie for giving me an opportunity to experience the working environment.

A sincere thank you to all the staffs from Pejabat Mara Daerah Kuala Krai for giving me chance to work with them. Thank you to my supervisor, En. Hasdi bin Hussin for the learning process and the advices for these three months.

I am forever indebted to my family especially to my parents. Lastly, a special acknowledgement goes to UiTM, for giving me the opportunity to pursue the study in Bachelor (Hons) (Statistics). Also thankful to all those who support me by direct or indirectly and provide me great help for completion of this study. I have tried my level best to prepare this report but no one claim to perfect other than Almighty Allah.

ABSTRACT

This study aims to evaluate the communication apprehension, test anxiety and fear of negative evaluation factors towards anxiety level among UiTM Kota Bharu students. This study involved 250 of respondents by using stratified random sampling. Structural Equation Modeling (SEM) approach is used to analyse the inter-relationships among the multiple variables in a model. The result of independent samples t-test and Analysis of Variance (ANOVA) shows a significant different of the duration learning of foreign language only. Besides, the measurement model of these three factors shows a best fit (Root Mean Square of Error Approximation=0.068; Comparative Fit Index=0.953; Tucker-Lewis Index=0.946). The study suggested that the three-factor model was acceptable to be used to measure the level of anxiety among students because it is valid, reliable and simple.

Keywords: foreign language anxiety, communication, test anxiety, fear of negative evaluation, test anxiety, apprehension

TABLE OF CONTENTS

CONTENT	PAGE
ACKNOWLEDGEMENT	i
ABSTRACT	ii
TABLE OF CONTENTS	iii
LIST OF TABLES	vi
LIST FIGURES	vii
LIST OF FORMULA	viii
LIST OF ABBREVIATIONS	ix
 CHAPTER 1: ORGANIZATION BACKGROUND	
1.1 Background of Industrial Training	1
1.2 Objectives of Industrial Training	1
1.3 Industrial Training Attachment	2
1.3.1 Introduction and History	2
1.3.2 Organization	2
1.3.3 Management Operation	3
1.3.4 Vision and Mission	3
1.3.5 Client Charter	3
1.3.6 Organizational Chart	4
1.3.7 Logo of Mara	5
 CHAPTER 2: RESEARCH PROJECT	
2.1 Introduction	7
2.2 Background of the Study	7
2.3 Problem Statement	9
2.4 Research Questions	10
2.5 Objectives of the Study	10
2.6 Research Hypotheses	11
2.7 Scope and Limitations of the Study	11
2.8 Significant of the Study	11

CHAPTER 3: LITERATURE REVIEW

3.1	Introduction	13
3.2	Definition of Terms	13
	3.2.1 Communication Apprehension	13
	3.2.2 Test Anxiety	14
	3.3.3 Fear of Negative Evaluation	14
3.3	Literature in each Variable	14
	3.3.1 Communication Apprehension	14
	3.3.2 Test Anxiety	16
	3.3.3 Fear of Negative Evaluation	18
	3.3.4 Level of Anxiety	19
3.4	Summary of Literature Review	20

CHAPTER 4: METHODOLOGY

4.1	Introduction	23
4.2	Type of Data	23
4.3	The Population of Study	23
4.4	Sampling Size and Technique	24
4.5	Data Collection Procedure	25
4.6	Theoretical Framework	25
4.7	Measuring Instrument	26
4.8	Data Processing and Analysis	28
	4.8.1 Confirmatory Factor Analysis (CFA)	28
	4.8.2 Assessment of Unidimensionality	29
	4.8.3 Assessment of Validity	30
	4.8.4 Assessment of Reliability	31
	4.8.5 Assessment of Normality	32
	4.8.6 Structural Equation Modeling (SEM)	32
	4.8.7 Descriptive Statistics	33
	4.8.8 Independent Samples T-test	34
	4.8.9 One way Analysis of Variance (ANOVA)	34

CHAPTER 5: FINDINGS AND DATA ANALYSIS

5.1	Introduction	36
5.2	Confirmatory Factor Analysis (CFA)	36
	5.2.1 Reliability and Validity Assessment for a Measurement Model	40
	5.2.2 Normality Assessment	42
5.3	Structural Equation Modeling	43
	5.3.1 Path Analysis of Structural Equation Modeling	43
