ACKNOWLEDGEMENT

ALHAMDULILLAH...

The most gratified to Allah S.W.T for giving me an opportunity to complete my report on time. This report is prepared because it was a part of our studying process where it was included in practical training.

First and foremost, I want to express my thanks to my supervisor Mr. Mohd Khairuddin Bin MD. Hamdar as Building Engineer of Public Work Department (PWD) for his condolences to give me an opportunity to join this company for my practical training. Being my supervisor during my practical training, he always lends his help to us when I got any troubles especially in my learning process to do a new work. Besides that, he always available to give me a knowledge and advises when I am doing mistake. The ways he treat practical students expose us deeply in construction world.

I also would like to give my appreciation to Assistant Building Engineer and staffs which is Mr Baharuddin bin Omar , Encik Razak, Mr Abd. Rahim bin Shahar, Mrs. Ra'aini bt Ismail and Encik Ramli bin Hassan for giving guidance that is useful to me. They never refuse to point me the truth when I am not able to do the work that be given. Without their help, of course I will not be exposed with the reality of Building Surveyor professions. A lot of thanks to my lovely parent to their support.

Last but not least, most thanks for all BS lecturers especially Mrs. Nur Fadhilah Binti Bahardin, Sr Mohd Nurfaizal Baharuddin and Sr Nor Amin Mohd Radzuan because with their help and consideration, I was able to be in practical training. For BS department thank you very much with the existence of practical training, it can mostly expose students into the reality of job world. For all my friends, thank you for sharing the ideas and always give your help when I am in difficulty. Lastly, thanks for many kinds of helps and co-operation from all. I hope this report will satisfy all especially my courses lecturers.

THANK YOU VERY MUCH....
