ACKNOWLEDGEMENT

Alhamdulillah, praise to Allah, the Most Merciful, the Most Graceful.

Firstly, I would like to extend my heartfelt gratitude for guidance, advice and help throughout the period of training by following group of amazing individuals. First and foremost, I would like to thank Encik Husaimie Bin Samsudin (Assistant Operations Project Management) for the opportunity given, to conduct my training in his esteem company. Ahmad Kamil Bin Ahmad Mahir (Site Agent) and Encik Sony Bin Zarim (Consultant) have enable me to learn and develop my understanding, knowledge and feel of real time project, know manage a project on the site as well as the approval of the work associated with other departments and the theory involved of structure, building and civil work. Also to the site personal in site at Bera, Pahang and Pengurusan Air Pahang Berhad (HQ), Kuantan who have extended their cooperation and help to further enhance my ability in understanding the procedure in construction and site a administration, test procedure, site safety, and best practices in the industry, It is an honour for me to be given the opportunity to ‘work’ with all of them. I would also like to give a big appreciation to ALL the UiTM lecturers that have taught and nurtured me in becoming a better student and person. I would like to extend my deepest appreciation to the lecturers who directly involved during my practical training To En Mohd Asrul Bin Hassin, Supervising Lecturers, Sr Muhd Nurfaaisal Bin Baharuddin, Training Coordinator, I value the time, effort encouragement and ideas that they have contributed towards the successful completion of my training, this report and the valuable knowledge.

Last but not least, my special thanks to my beloved parents for their sacrifices over the years who always support me through thick and thin. Their endless support is always what I needed in order to complete this report with success.

Thank you so much.

ABSTRACT

The report contains statements about the method of construction work. Basis for Management Development Air Pahang Berhad for the new office. Topics represented in this report is very important for job approval. The method in this report for the purpose of making it the supervisor reports to understand the progress of work flow method which starts up the finishing work. In addition, there are figures, drawings, attachments that are collected from the company are included in the report. This content contains information for the project and have the information that will be tasked to ensure the success of the project. It also has a scope of work that has been assigned to implement the project.

There is some information on the approval form work and also the procedure for implementation of construction works on site. Any reference to the implementation of the work will be referred by government departments like Majlis Daerah Bera, Jabatan Kerja Raya (JKR), Tenaga Nasional Berhad (TNB), Jabatan Bomba & Penyelamat Malaysia (Fire & Rescue Department of Malaysia)

For the implementation of the work will have some requirement such as Quality Planning (QP), Quality Assurance (QA) and Quality Control (QC) so that the procedure can be carried out properly. There is a method statement for checked and tested by the Enforcement Officer to validate these methods. The process also works in the body to facilitate the work on site. Some descriptions have been made to describe the work of the observation during practical training. Some of the problems and possible solutions have been created to facilitate the work on the next site.
