Company produces Infinite Candle which has different function compare with the usual candle out there. Infinite candle is a candle where is reuse usage because it can reform another candle itself when used up. This candle intended to supply to household, restaurants and therapy sessions.

To make it more attractive and interesting, we decided to make the candle which is sleek-yet-simple candle holder which collects the melting, dripping wax that otherwise might go to waste, and shapes it to form a new candle. As the candle burns down, the hot wax drips and accumulates in the plastic candle form around a new wick. Once the transparent stem is full of the used wax and has cooled, it can be removed and the process can start again.
