ABSTRACT

In today's world, there exists an intensive competition between enterprises especially those in the same sector or selling similar products as others. Adenium Optical is one of the enterprises facing competition in meeting the customer needs in selling eyewear products. One of the issues that has arisen in this shop is abundant untouched products that being ignored by the customers that causing losses to the business. There are several factors that resulted in such predicament, and wrong supplier selection is one of them. Therefore, this study will assist the owner of Adenium Optical to select the best supplier who will be able to supply the right quality products with the right price and able to give services at the right time with the right quantities. Yuen's Fuzzy TOPSIS has been applied in this study to select and rank the five selected suppliers in order to handle the linguistic variables evaluated by the decision makers. Five criteria have been taken into consideration and Best Non-fuzzy Performance (BNP) method was employed in ranking these criteria; quality, price, delivery, technology, and supplier profile. Yuen's Fuzzy TOPSIS results were generated using Microsoft Excel. It shows that the first-ranked supplier is Supplier 5 with the value of closeness coefficient is 0.886. This value is chosen based on the nearest to Positive Ideal Solution (PIS) and farthest from Negative Ideal Solution (NIS) which are nearest to 1 and farthest from 0. Meanwhile, the lowest value of closeness coefficient is 0.160 and it belongs to Supplier 2 with the lowest rank. Regarding the BNP's calculation result, it is shown that there are three criteria having the same value of 0.811 which are quality, price, and technology. They were classified as the most important criteria in evaluating the supplier and the least important criteria are delivery and supplier profile which both have identical BNP value which is 0.756.

TABLE OF CONTENTS

CONTENTS	PAGE
SUPERVISOR'S APPROVAL	ii
STUDENT'S DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	viii
LIST OF TABLES	ix

CHAPTER ONE: INTRODUCTION

1.1	Background of the Study	1
1.2	Problem Statement	2
1.3	Objective of the Study	3
1.4	Scope of the Study	3
1.5	Significance of the Study	3

CHAPTER TWO: LITERATURE REVIEW

2.1	Eyewear Market Growth	4
2.2	Criteria for Selecting the Supplier	4
2.3	Supplier Selection with Various Technique	5
2.4	Technique for Order Preference by Similarity to Ideal Solution (TOPSIS)	6
2.4.1	Fuzzy Technique for Order Preference by Similarity to Ideal Solution (FTOPSIS) by Chen (2000) and Yuen (2014)	7
2.4.2	Fuzzy TOPSIS Technique in Selecting the Supplier	7
2.5	Other Applications by using Fuzzy TOPSIS Technique	8

2.6	Summary	9
-----	---------	---

CHAPTER THREE: RESEARCH METHODOLOGY

3.1	Method of Data Collection	10
3.2	Method of Data Analysis	11
3.3	Fuzzy Set Theory	11
3.3.1	Fuzzy Sets	11
3.3.2	Triangular Fuzzy Number	11
3.4	Linguistic Variable	12
3.5	Fuzzy Technique for Order Preference by Similarity to Ideal Solution (FTOPSIS)	14
3.5.1	Introduction	14
3.5.2	Steps in Fuzzy TOPSIS	15
3.6	Summary	18

CHAPTER FOUR: RESULTS AND DISCUSSIONS

4.1	Result Analysis	19
4.2	Summary	29

CHAPTER FIVE: CONCLUSIONS AND RECOMMENDATIONS

5.1	Conclusions	30
5.2	Recommendations	30
