1.2.13 Public Bank Berhad	16
1.2.14 Wong Engineering	16
1.2.15 Zecon Bhd	17
1.3 Problem Statement	18 – 19
1.4 Objective Of Study	20 – 21
1.5 Scope Of Study	22
1.6 Significance Of Study	23
1.7 Concluding Remark	24
CHAPTER 2 LITERATURE REVIEW	
2.1 Intellectual Capital	25 – 26
2.2 Value Added Intellectual Coefficient (Vaic)	26 – 27
2.3 Intellectual Capital And Financial Performance (Return On Asset)	27 – 28
2.4 Human Capital And Financial Performance (Roa)	28
2.5 Structural Capital And Financial Performance (Roa)	28 – 29
2.6 Capital Employed And Financial Performance (Roa)	29
2.7 Concluding Remark	30
CHAPTER 3 RESEARCH METHODOLOGY	
3.1 Theoretical Framework	31
3.2 Hypothesis	32
3.3 Data Collection	33

3.4 Research Model	33
3.5 Data Analysis	34
3.5.1 Multiple Linear Regression Function	34
3.5.2 Value Added Intellectual Coefficient (Vaic)	34 – 36
3.5.3 Pearson Correlation Analysis	36
3.5.4 Financial Performance On Return On Asset	37
3.6 Concluding Remark	37
CHAPTER 4 FINDINGS AND RESULTS	
4.1 value Added Human Capital (Vahu)	38 – 39
4.2 Value Added Capital Employed (Vaca)	40 – 41
4.3 Value Added Structural Capital (Stva)	42 – 44
4.4 Value Added Intellectual Capital (Vaic)	45 – 46
4.5 Average Of Vaic And Its Component	47 – 49
4.6 Descriptive Analysis	50 – 51
4.7 Panel Specification Analysis	51
4.7.1 Panel Specification Tests	51
4.7.2 Diagnostic Tests For Static Models	52
4.7.3 Regression Results	52 – 53
4.8 Summary Of The Results	54 – 56
4.9 Concluding Remarks	56
CHAPTER 5 RECOMMENDATIONS AND CONCLUSION	
5.1 Conclusion	57 – 58
5.2 Recommendations	59 – 60
5.3 Concluding Remark	60

ABSTRACT

The objective of this study is to determine the relationship between components of Intellectual Capital (IC) towards Return on Asset (ROA) of the company. IC is comprises of three components which is Human Capital (HC), Structural Capital (SC), and Capital Employed (CA). The data is obtained from annual report of each company and from previous study. In this study, the data is being collected from year 1999 until 2018 from fifteen (15) companies some selected Malaysian Public Listed Companies. Financial statements is the data being extracted for the purpose of this study. The reason these fifteen companies is being chosen because it is a public listed company and they are using a high technology for their production. This study are using Value Added Intellectual Capital (VAIC) method in order to determine the relationship between Intellectual Capital components and Return on Asset of the company.

Besides that, tests such as Descriptive Analysis, Pearson Correlation and Regression Analysis was used to determine the relationship between IC components and ROA of the company. As for the findings, VAHU seems to be the most significant compare with VACA, STVA and VAIC. This shows that companies are depending highly towards VAHU in order for them to increase their performance. More than that, STVA and VACA is not significant, meaning that the company are not able to utilize the component efficiently,

Overall, the company need to applied intellectual capital components for their company in order to increase competitive advantage and financial performances.
