TABLE OF CONTENTS

Acknowledgment	iv
Abstract	v
List of Appendices	vi
Liabilities Disclaimer	vii
Chapter 1	
1.0 Introduction	1
1.1 Objective	3
Chapter 2	
2.0 Scope and Limitation	
2.1 Scope	4
2.2 Limitation	5
Chapter 3	
3.0 Literature Review	6
Chapter 4	
4.0 Rules on Foreign Funds	13

Chapter 5

5.0 Data and Research Methodology

5.1 Data	16
5.2 Regression Analysis	17
5.2.1 Parameter analysis	17
5.2.2 t-Statistic	18
5.2.3 Standard Error Regression (S.E.R.) analysis	19
5.2.4 Coefficient of Determination (R^2)	19
5.3 Graphical Model	20

Chapter 6

6.0 Result of Regression and Data Analysis	21
6.1 Chart	42

Chapter 7

7.0 Finding	
7.1 Regression Finding	52
7.2 Chart Finding	56

ACKNOWLEDGMENT

BISMILLAHIRRAHMANIRRAHIM

I would like to take this opportunity to convey my deepest gratitude to Prof. Madya Lee Keng Choon as my supervisor, for his patience in assisting me towards the completing this study.

I also would like to thanks all my group members especially Rozaimah and Syed Faisal for being a best friends.

Also to my mum, which at the completion of this study is in Makkah. I love you mum.

ABSTRACT

Many people mostly stock players in Malaysia believed that there is an effect of foreign funds towards the share prices, market liquidity and market volatility. This project paper will try to determine whether there is an direct effect of foreign funds towards our share market.

The study is based on the 5 year period of portfolio foreign funds flows into and out of Malaysia for the purchase and sale of corporate and government securities between residents and non-residents over the period from January 1992 to November 1996. The market data use in these study are the KLSE Composite Index, Emas Index, Second Board Index, Main Board Volume, Second Board Volume and Market Capitalization.

The regression and chart analysis are use to determine the relationship between the foreign funds and variables. The regression analysis use by the author is to determine the Coefficient of Determination (R^2), t-Statistic, Parameter analysis and Hypothesis test. The chart analysis is to determine the trend lines between the variables.
