## **ACKNOWLEDGEMENT**

Alhamdulillah gratitude to Allah S.W.T Creator to all beings in the heavens and on earth because with His grace I still have the desire to fulfil the obligations that have been given. First of all, I am Hanis Binti Mohd Tajuddin would like to thank my parents who have given me much encouragement and support to finish my final year project.

On this occasion, I would like to extend my sincere thanks to all my friends who also have given me guidance, encouragement, advice and ideas on finishing my final year project. All the guidance given from lecturers and friends I will make the best use in my town planning studies in the future.

Finally, I would like to extend my thanks to my incredible supervisor Madam Nor A'aini Othman for her cooperation, guidance, advice, valuable knowledge. I will continue use the knowledge that I have earned so well.

Thank you

## **ABSTRACT**

Parking spaces has become a serious problem of everyday occurrence at Ipoh Railway Station since it is one of the major transportation. Ipoh Railway Station is one of the train station that have a very high demand of parking especially during peak hour. This problem is getting worse and more frustrating in Ipoh Railway Station due to the fact that customers that come to the Ipoh Railway Station are so hard to find a parking spaces for them to park their cars. This study aim is to study the provision of parking spaces at Ipoh Railway Station. The data collection of this parking provisions will gather and measuring the information on variable interest, in an establish systematic fashion that enables one to answer the research questions and evaluate outcomes of findings in the study. The data was analysed to evaluate and determine parking spaces and the demand of parking that influence the strategic approach to the planning and successful of parking management. The research suggested some of the recommendations that will solve the parking problems at Ipoh Railway Station. The results of the study also show it is hope that the study can contribute to the improvement of parking planning management systems in Ipoh Railway Station.
